**Press Release** 

NetConnect Germany to tender contracts for the supply of extraterritorial networks via the Neth-

erlands

Ratingen (Germany), 11 July 2019. NetConnect Germany GmbH & Co. KG (NCG) is again conducting –

as already informed in May 2019 – a tender process for gas deliveries from November 2019/January

2020.

Tenders are invited for the provision of gas quantities via the Netherlands at the cross-border inter-

connection point Tegelen located on the German-Dutch border, with delivery to be made in the period

from November 2019 up to and including March 2020 (with a monthly termination option), as well as

at the German-Dutch cross-border interconnection points Dinxperlo and Haanrade, with delivery here

to be made from January 2020 up to and including December 2020 (with a monthly termination option

as well).

NCG is carrying out this tender process to secure the possibility of supplier switching at end user level

whilst continuing to meet market liberalisation requirements. In choosing this approach, NCG ensures

that the network areas downstream from the cross-border interconnection points Tegelen, Dinxperlo

and Haanrade can be integrated into the NCG market area despite their having no physical connection

to the German gas network, and thus enables suppliers to supply customers located in these network

areas via the NCG market area. Gas deliveries to end users in these network areas are not part of the

scope of the tender.

NetConnect Germany handles the operational management of the market area cooperation between bayernets GmbH, Fluxys TENP GmbH,

Thyssengas GmbH, Open Grid Europe GmbH, GRTgaz Deutschland GmbH and terranets bw GmbH. The NCG market area, which stretches

from the North Sea coast down to the Alps, is the largest in Germany, with a high-pressure pipeline network totalling around 20,000 kilome-

tres in length and connecting more than 500 downstream networks.
