GASPOOL revises gas quality switchover charge up to 0,0865 €/kWh/h/a

Berlin (Germany). The pass-through amount charged at all exit points within the GASPOOL market area to recover the costs for switching over network areas from low CV gas quality to high CV quality valid from 1 January 2016 had to be corrected due to errors in the underlying capacity data reported to the company. At the beginning of this week GASPOOL was notified that one transmission system operator (TSO) had submitted incorrect data, as a consequence of which the pass-through amount had to be recalculated. The correct charge is 0,0865 €/kWh/h/a.

The German federal regulator Bundesnetzagentur has been informed about these subsequent corrections for the calendar year 2016.

About GASPOOL

GASPOOL Balancing Services GmbH is a Berlin-based joint venture of GASCADE Gastransport GmbH, Gastransport Nord GmbH, Gasunie Deutschland Transport Services GmbH, Nowega GmbH and ONTRAS Gastransport GmbH.

The object of the company is the operation of the GASPOOL market area in Germany, which connects around 350 downstream natural gas transportation networks. Following the integration of the market area H-Gas Norddeutschland, Jordgas Transport GmbH also joined the market area cooperation.
