1 Login page of the Customer Portal

To access the Customer Portal, follow the link on the Trading Hub Europe website (alternatively, you can find the Customer Portal at <https://kundenportal.tradinghub.eu/>):

The screenshot shows the Trading Hub Europe website header. The logo is on the left, and navigation links are in the center: Home, About us, Publications, Services, Download, Portals (highlighted with a red box), and Contact. A search icon is on the right. Below the navigation, a dropdown menu for 'Portals' is open, showing 'Customer Portal' (highlighted with a red box), BSP, VTP Portal, and KRP.

The login page of the Customer Portal will open:

The screenshot shows the Customer Portal login page. The header includes the Trading Hub Europe logo and the text 'Customer Portal'. The page is divided into two columns. The left column is titled 'Login' and contains a form with fields for 'Username' and 'Password', a 'Remember me' checkbox, a 'Forgot Password?' link, and a blue 'Login' button. Below the form is a section titled 'You don't have an account?' with the text 'Start the admission process here:' and a blue 'Admission' button. The right column is titled 'Welcome!' and contains a welcome message, a list of functions, and a note about access after admission. The footer includes contact information and legal notices.

Welcome!

Welcome to the Customer Portal of Trading Hub Europe.
According to your market role the THE Customer Portal offers the following functions:

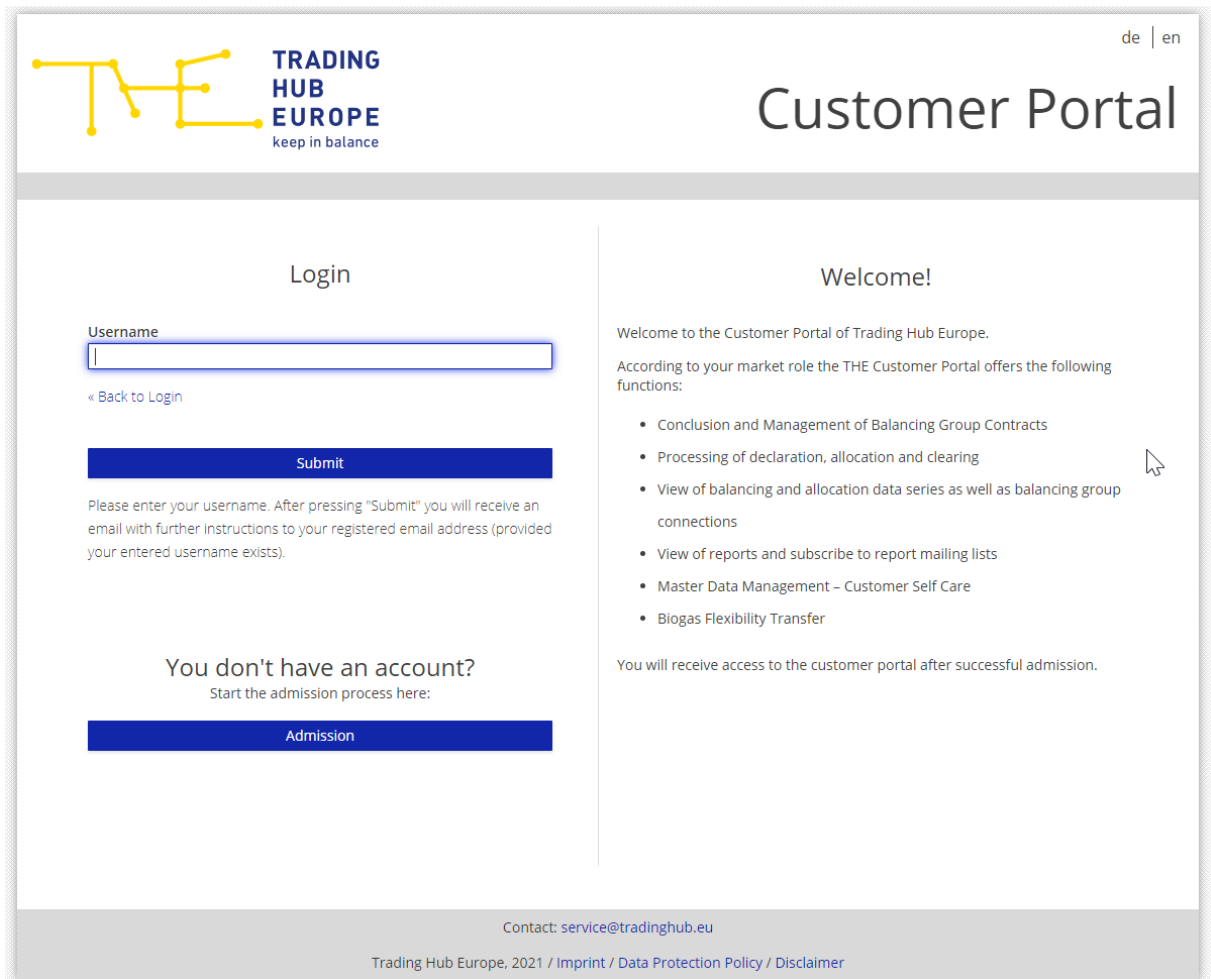

- Conclusion and Management of Balancing Group Contracts
- Processing of declaration, allocation and clearing
- View of balancing and allocation data series as well as balancing group connections
- View of reports and subscribe to report mailing lists
- Master Data Management – Customer Self Care
- Biogas Flexibility Transfer

You will receive access to the customer portal after successful admission.

Contact: service@tradinghub.eu
Trading Hub Europe, 2021 / Imprint / Data Protection Policy / Disclaimer

Here you can log in, reset your password or start the admission process to the Customer Portal.

To reset your password, please use the 'Forgot password' function. Enter your user name and click on "Submit". You will then receive an automatically generated e-mail with further instructions.

The screenshot shows the Trading Hub Europe Customer Portal interface. At the top left is the logo with the text "TRADING HUB EUROPE keep in balance". At the top right are language options "de | en" and the title "Customer Portal". The page is split into two columns. The left column is titled "Login" and contains a "Username" input field, a "Submit" button, and a link "« Back to Login". Below this is a section titled "You don't have an account?" with the text "Start the admission process here:" and an "Admission" button. The right column is titled "Welcome!" and contains a welcome message, a list of functions, and a note about access after admission. The footer contains contact information and legal links.

2 Admission to the Customer Portal

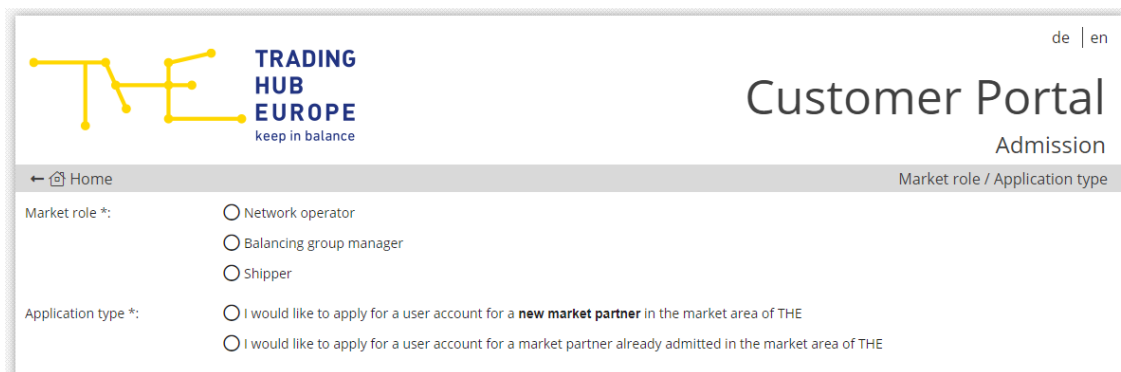

To start the admission process, click on "Admission".

You don't have an account?

Start the admission process here:

Admission

Select the market role "Balancing group manager" and indicate whether your company (or the company for which you provide services) is already admitted as a market partner in the THE market area or whether you want to admit your company (or the company for which you provide services) as a market partner for the first time.

The screenshot shows the 'Customer Portal' interface for 'Admission'. The header includes the THE logo and 'TRADING HUB EUROPE keep in balance'. The page title is 'Customer Portal' with 'Admission' below it. A navigation bar shows 'Home' and 'Market role / Application type'. The main content area contains two sections: 'Market role *:' with radio buttons for 'Network operator', 'Balancing group manager', and 'Shipper'; and 'Application type *:' with radio buttons for 'I would like to apply for a user account for a new market partner in the market area of THE' and 'I would like to apply for a user account for a market partner already admitted in the market area of THE'.

Depending on the type of application you have selected, you will be directed to the corresponding admission form.

Please note that the fields marked with an asterisk (*) in the online admission form are mandatory.

First you have to enter some information about your company. For the admission as Balancing Group Manager, you either need a DVGW market participant code (in the role of Balancing Group Manager) or an international GLN. If your company does not have any of the above codes, you can, for example, apply for the DVGW code on the DVGW website (<https://codevergabe.dvgw-sc.de/>).

Admission

Personal data

← Home

Existing user: Yes ⓘ

Email *:

When the registration form has been fully and correctly completed, you will receive an e-mail confirming receipt of your application for admission.

THE will then verify the data provided in the form and you will receive a separate e-mail specifying the documents you need to submit to complete the admission process.

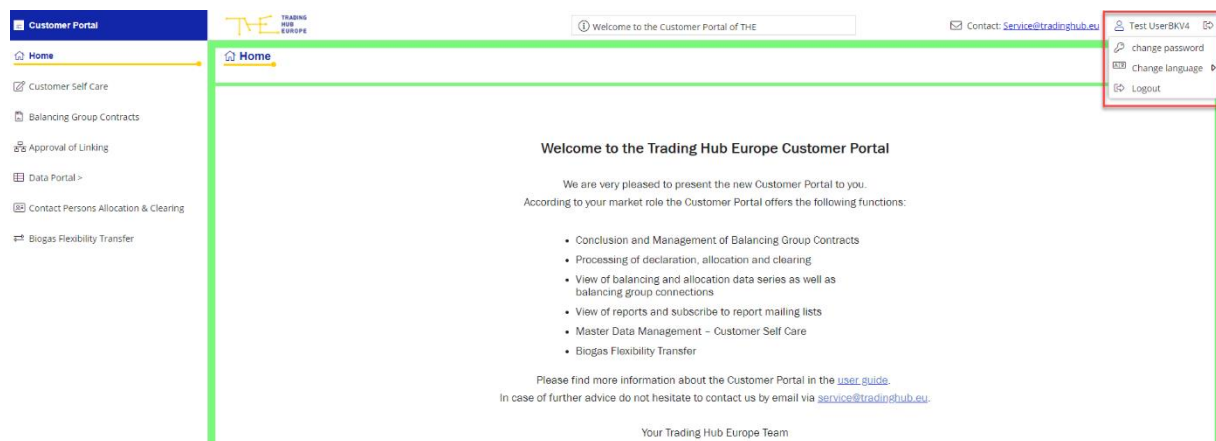

As soon as you have submitted the requested documents in full and THE has successfully completed its review, you will be informed about the activation of your account and the corresponding access data will be sent to you by e-mail. Please change the initial password when you log in to the Customer Portal for the first time. Once you have activated your account you can then use the functions of the Customer Portal.

Important: If the user and/or company data you provided during registration have changed, please make the relevant changes in the menu item "Customer Self Care" when you log in for the first time. This is the only way THE can guarantee a smooth process for invoicing, sending market information or general queries.

3 General information about the Customer Portal

By clicking on your login name you can

- change your password
- change the language (German/English)
- log out of the Customer Portal

If you have any questions about the Customer Portal, please contact service@tradinghub.eu. You will also find this contact address to the left of your login name.

The menu on the left-hand side of the Customer Portal can be collapsed with a click on the double arrow « . Click on the double arrow » to expand the menu.

3.1 Authorisations in the Customer Portal

The Customer Portal allows THE to assign different authorisations to a user. In principle, these authorisations apply to all assigned companies.

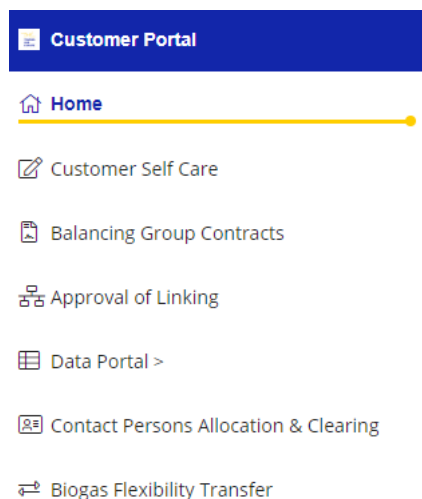

Please note that the first user of a newly admitted Balancing Group Manager basically applies for and receives all authorisations, e.g. to be able to conclude balancing group contracts. For further users, the authorisations can be applied for individually as part of the process of admission to the Customer Portal. For this purpose, the user will be provided with the corresponding form to be signed after the online admission application has been completed.

Authorisations can be granted for the following functions:

- **Maintenance of company master data:**
Maintenance of master data of the company/ies for which the user is authorised.

- **Conclusion and administration of balancing group contracts/balancing group structures:**
Conclusion and termination of balancing group contracts as well as creation and termination of balancing group links.
- **Data portal reading rights:**
Viewing balancing group data (declarations and allocation data), ordering reports, and viewing requested clearing numbers within the scope of allocation data clearing.
- **Data portal write right:**
Viewing balancing group data (declarations and allocation data), ordering reports and applying for a clearing number as part of the allocation data clearing process.
- **Biogas flexibility exchange:**
Managing the exchange of biogas flexibilities between biogas balancing groups.

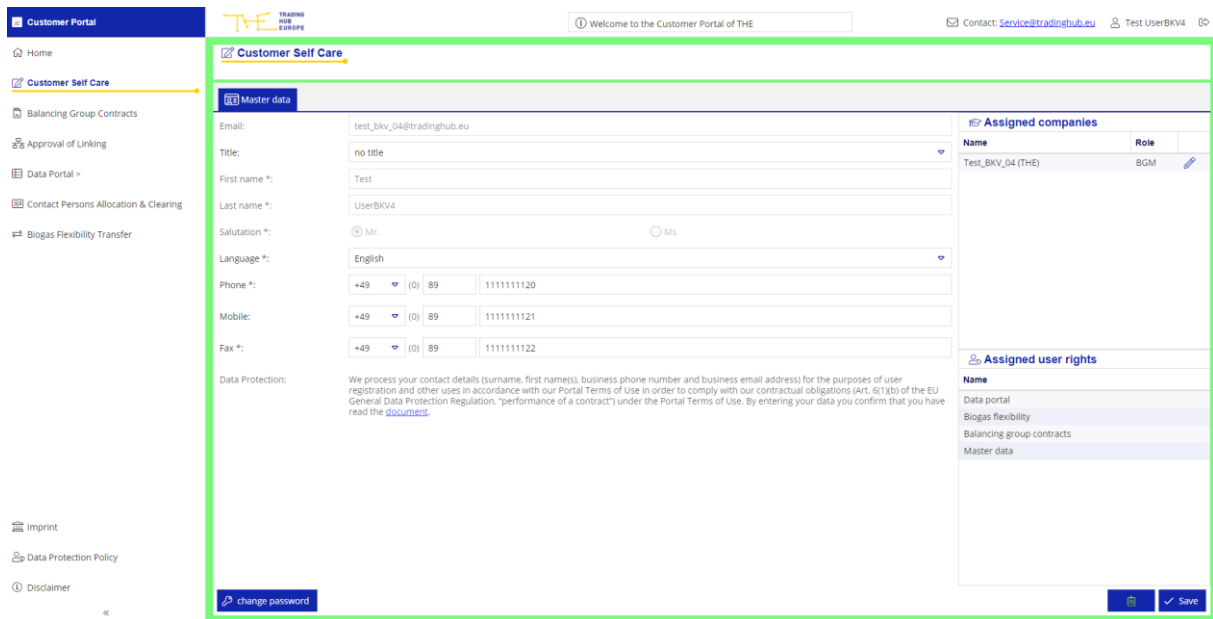

A user with all authorisations will see the following menu:

The menu item "Contact Person for allocation & clearing" is available to every user, regardless of the authorisations. Here, the contact persons for allocation & clearing processes can be viewed by Balancing Group Managers and Network Operators.

4 Master data

In the Customer Portal, each user can edit their personal user data and – if authorised – the master data of the assigned companies. The master data can be viewed and edited via the "Customer Self Care" menu item.

The screenshot shows the 'Customer Self Care' portal. The main content area is titled 'Master data' and contains a form with the following fields:

- Email: test_bkv_04@tradinghub.eu
- Title: no title
- First name *: Test
- Last name *: UserBKV4
- Salutation *: Mr. Ms.
- Language *: English
- Phone *: +49 (0) 89 111111120
- Mobile: +49 (0) 89 111111121
- Fax *: +49 (0) 89 111111122

Below the form is a 'Data Protection' notice. At the bottom left of the form is a 'change password' button. At the bottom right is a 'Save' button with a checkmark icon.

On the right side, there is a table titled 'Assigned companies':

Name	Role
Test_BKV_04 (THE)	BGM

Below this table is a section titled 'Assigned user rights' with a list of rights: Data portal, Biogas flexibility, Balancing group contracts, and Master data.

4.1 Changing personal master data

User data with a grey background cannot be edited by the user. If you wish to make changes to these data, please contact THE. To change master data that can be edited, click in the desired field, enter the change and then click .

The form field  to the left of the Save button shows the mandatory field validation and will prompt you to enter more details if you have not completed all mandatory fields.

Below the user data, you can click on  to change the password.

In the right-hand area next to the user data, the company to which you are assigned is shown. If you are assigned to several companies, e.g. due to several service relationships, the corresponding companies are listed below each other.

Below the company, the screen shows the authorisations the user has applied for and received as part of its authorisation process.

4.2 Changing company master data

Clicking on the pencil icon next to the company name enables you to view the company master data and, with the relevant authorisation, to edit it.

Assigned companies		
Name	Role	
Test_BKV_04 (THE)	BGM	

When you click on the pencil icon, another tab with the company data will open to the right of the master data tab:

Reset
 Save

Fields that cannot be edited by the user have a grey background. If you wish to make changes to any of these fields, please contact THE.

To change the master data that can be edited, simply click in the desired field, enter the change and click on .

If you have to undo changes made to the user/company data, you can cancel the editing process by clicking on . This will restore the original status of the master data.

The form field to the left of the Save button shows the mandatory field validation and will prompt you to enter more details if you have not completed all mandatory fields.

4.2.1 Changing contact persons

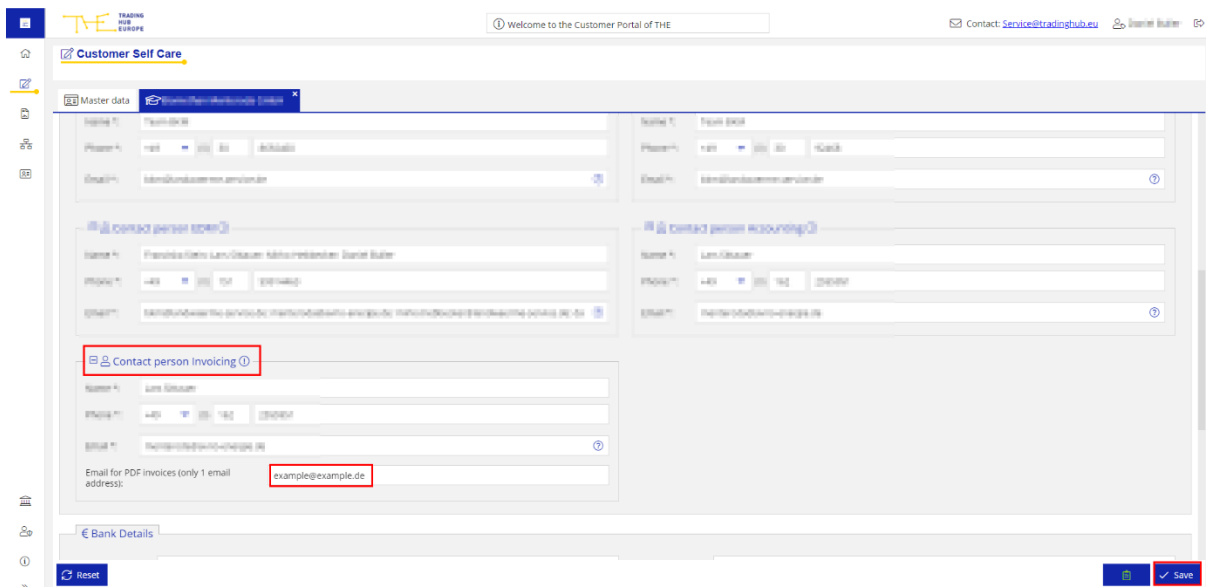

When changing contact persons, please note that the changes will only be permanent after the contact person has agreed to them. The old contact person data will remain valid until approval has been given. If the changed contact person does not agree within 14 days, the change request is automatically rejected.

You can return to the user data by closing the company data tab or by clicking on the master data tab.

4.2.2 Changing Email for PDF invoices

The email address for sending invoices via PDF can be changed in the company master data at the “Contact person Invoicing”. You can only enter one email address. After the email address has been entered, the change must finally be saved.

5 Balancing group contracts

If you are authorised to conclude and terminate balancing group contracts and to manage balancing group structures, you can use the menu items "Balancing group contracts" and "Approval of Linking" in the Customer Portal.

The "Balancing group contracts" menu item is divided into the following areas:

- Balancing group list
- Details (of the balancing group contract called up)
- Linking arrangements
- Balancing group portfolio

The areas can be expanded or collapsed using the arrows /.

5.1 Balancing group list

In the "Balancing group list" section, the balancing group contracts you have concluded and the balancing subgroups are displayed with their status (valid, valid from future date, terminated). The balancing subgroups are indented. Above the listed BGs/BSGs there is a search field which you can use to search for balancing group codes.

Balancing Group Contracts

+ Conclusion of new balancing group contract

5.2 Conclusion of balancing group contracts

Below the balancing group list you can conclude balancing group contracts and balancing subgroups by clicking on "Conclusion of new balancing group contract".

Please use the input mask that appears in order to select the desired parameters of the contract to be concluded.

① **Balancing group contract**

Details

Company name: Test_BKV_04 (THE)

Contract type: Balancing group Balancing subgroup

Gas quality: H gas L gas

Biogas: Yes No

Capacity type: FZK ⓘ DZK ⓘ

Undiscounted capacity tariff: Yes ⓘ

VTP access: Yes No

Valid from: ⓘ

I accept the [Balancing Group Contract Terms & Conditions](#)

Company name

The company name is automatically displayed here. If you are assigned to several companies in the portal (e.g. due to service relationships), the company for which you want to conclude the contract must be selected here.

Contract type

In this field you must specify whether a balancing group contract or a balancing subgroup is to be concluded.

Associated BG

If a balancing subgroup is to be concluded, one of your currently valid or future balancing group contracts must be selected here.

Gas quality

Select the gas quality (H-gas or L-gas) for which the contract is to be concluded.

Biogas

Here you must select whether the new balancing group contract is a balancing group for biogas. If "No" is selected, a natural gas balancing group contract is concluded.

Capacity type

The capacity type FZK (freely allocable capacity) or DZK (dynamically allocable capacity) must be selected here. Explanations of the capacity types appear when you move the mouse pointer over the corresponding question mark symbol. If DZK is selected, the DZK type must also be selected.

Undiscounted capacity tariff

By selecting this parameter, you conclude a separate BG/BSG contract for adding only entry and/or exit points at gas storage facilities connected to the market area of another state, which are exclusively subject to an undiscounted capacity charge.

VTP access

No individual selection can be made here, as balancing group contracts with the capacity type FZK automatically receive access

to the VTP, while balancing group contracts with the capacity type DZK do not receive access to the VTP.

Valid from This field determines the date from which the contract is to be valid.

When a balancing group contract/balancing subgroup account is concluded, there is an implementation period of 10 business days, which means that it will take at least 10 business days after the conclusion of the contract before the contract is activated. The earliest possible start date will be shown to you for selection.

When a new balancing group contract or balancing subgroup account is concluded, the contractual terms and conditions must be accepted. When a biogas balancing group contract is concluded, the "Supplementary Energy Balancing Provisions for Biogas (Appendix to the Balancing Group Contract Terms & Conditions)" must also be accepted.

If the input mask has been fully and correctly completed, the  button appears so that the balancing group contract can be finally concluded.

If the Balancing Group Manager concludes both H-gas and L-gas balancing group contracts with the capacity type FZK within the market area, these must be connected with each other in the "[Linking arrangements](#)" section. This means that in this case only one balancing group contract at most may be managed as a master balancing group.

5.3 Details

The "[Details](#)" section shows information and parameters for the relevant BG/BSG selected in the balancing group list. The parameters can no longer be adjusted after the contract has been concluded and are therefore greyed out. However, you can give your consent to publication as a THE VTP trader on the THE website or withdraw your consent [here](#).

If the balancing group was taken over from the NCG or GASPOOL market areas, the old balancing group code ("Balancing group old") is also displayed in the Details section.

① **Balancing group contract - THE0BBH690230000**

Details

Balancing group: THE0BBH690230000

Balancing group old:

Company name: Test_BKV_04 (THE)

Contract type: Balancing group Balancing subgroup

Gas quality: H gas L gas

Biogas: Yes No

Capacity type: FZK DZK

Undiscounted capacity tariff: Yes No

VTP access: Yes No

I hereby agree for my data to be published as trading participant at the THE VTP on the [THE website](#).

Valid from: 01.12.2020

Valid until: 01.10.2035

Click on to terminate the selected contract. A pop-up window will open. Here you can enter the desired termination date. The earliest possible termination date is specified in the calendar.

Note: A balancing group contract can be terminated with three months' notice to the end of the month. In addition, there must be no valid balancing group links in place at the time of termination. Please note that all associated balancing subgroup accounts are also terminated when the balancing group is terminated.

Termination

Termination balancing group contract

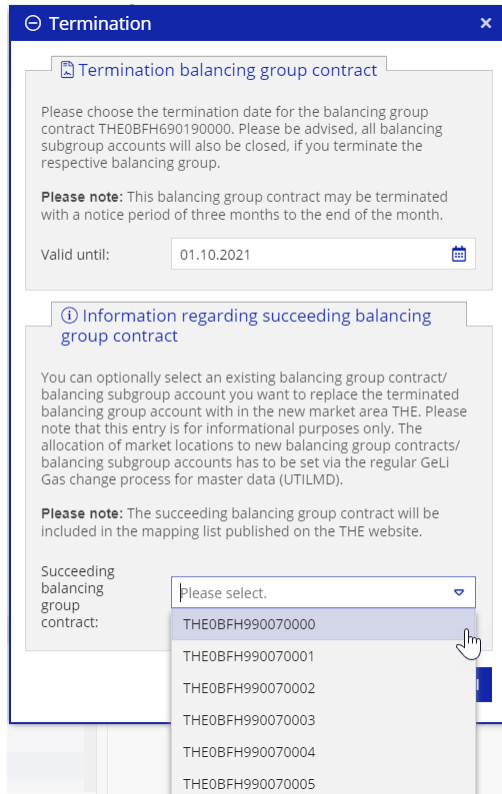

Please choose the termination date for the balancing group contract THE0BBH690230000. Please be advised, all balancing subgroup accounts will also be closed, if you terminate the respective balancing group.

Please note: This balancing group contract may be terminated with a notice period of three months to the end of the month.

Valid until: 01.10.2035

If you select the termination date 01.10.2021, the pop-up window expands and you can select a succeeding balancing group from your valid balancing groups. This entry is optional and for information only. The new allocation of market locations to the BG/BSG must still be carried out via the regular GeLi Gas master data change process (UTILMD).

Note: The succeeding balancing group will also be visible in the mapping list on the THE website and in the BG details in the Customer Portal.

A selected succeeding BG can only afterwards be changed via THE.

5.4 Linking arrangements

In the "Linking arrangements" area, balancing group links (starting from the lower-level balancing group) to a higher-level balancing group can be created, edited and terminated. In addition, links already created for the lower-level balancing group are displayed with the following information: higher-level balancing group (code), start date, end date and percentage share.

5.4.1 Creating a link

A balancing group link can only be created by the Balancing Group Manager whose balancing group is to become a lower-level balancing group. Via the  button, a link from the selected balancing group (from the balancing group list on the left) to another (higher-level) balancing group can be created.

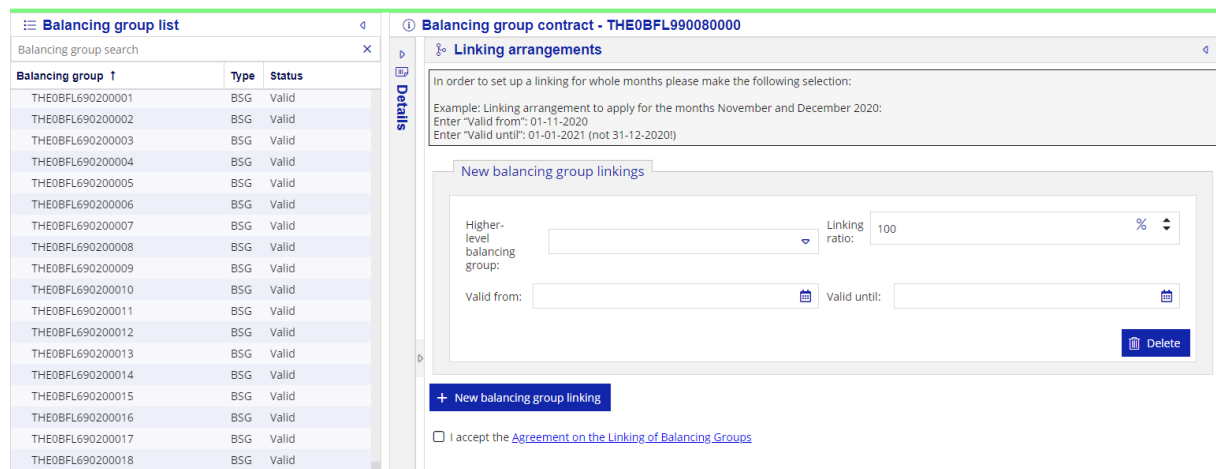

Consequently, the higher-level balancing group as well as the start date and end date of the link must be entered on the relevant screen. The percentage of the link is preset to 100%, but can be adjusted if a balancing group is to become a lower-level balancing

group up to a certain percentage only. A balancing group can be subordinated to one, but not more than four balancing groups.

If a link to several higher-level balancing groups (proportional allocation) is to be made, the corresponding linking ratio and further higher-level balancing groups must be selected by means of repeated clicks on **+ New balancing group linking**. The linking ratio must always total 100%.

Please note that a link must be valid for a minimum period of one month.

Balancing Group Contracts

The screenshot displays the 'Balancing group list' on the left and the 'Balancing group contract - THE0BFL990080000' details on the right. The list includes columns for 'Balancing group 1', 'Type', and 'Status'. The details view shows 'Linking arrangements' with instructions on how to set up linking for whole months. Below this, there is a section for 'New balancing group linkings' with a form containing a dropdown for 'Higher-level balancing group', a 'Linking ratio' field set to 100%, and 'Valid from' and 'Valid until' date pickers. A 'Delete' button is visible at the bottom right of the linking form. At the bottom of the details view, there is a '+ New balancing group linking' button and a checkbox for 'I accept the Agreement on the Linking of Balancing Groups'.

If all information has been filled in completely and correctly, the **Save** button for saving the link appears.

The **Delete** button can be used to discard information that has not yet been saved.

If a link to a higher-level balancing group of another Balancing Group Manager has been created, this Balancing Group Manager must agree to the new link. As long as the other Balancing Group Manager has not agreed to the newly created link, the new link remains in the approval process and cannot be edited. Approval is not required if you connect balancing groups of companies assigned to you.

Linking arrangements

In order to set up a linking for whole months please make the following selection:
 Example: Linking arrangement to apply for the months November and December 2020:
 Enter "Valid from": 01-11-2020
 Enter "Valid until": 01-01-2021 (not 31-12-2020!)

It is not possible to make changes because there are linkings in the approval process.

Linking arrangements - pending

Higher-level balancing group:	THE0BBH009690000	Linking ratio:	100 %
Valid from:	01.11.2021	Valid until:	01.12.2021

 Delete

The status of the link for future active links automatically changes from "Acceptance open" to "Accepted" as soon as the Balancing Group Manager of the higher-level balancing group has approved the link via the menu item "Approval of Linking".

Note: When creating/changing a balancing group link, an implementation period of 10 business days must be observed. This means that there must be at least 10 business days between the conclusion of the contract and the activation.

5.4.2 Modifying and deleting a link

A change can be made to active links as well as links that will be active in the future (if they have the "Accepted" status). If these are links to a higher-level balancing group of a BGM not assigned to you, the latter must first give its consent if the link is to be extended. In the case of a premature termination of the balancing group link, consent is not required. Every change needs to be confirmed via the  button.

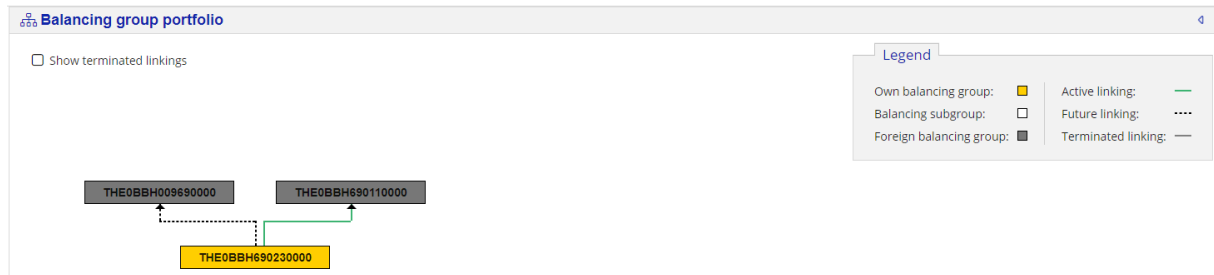

In addition, a link starting in the future (which has the "Accepted" status) can be selected for deletion via the  button. In order to confirm the deletion, press the  button.

Note: Three and six weeks before the end date of a balancing group link, an automated reminder e-mail is sent to the Balancing Group Managers involved (higher-level and lower-level Balancing Group Managers). This e-mail will make reference to the link that is about to expire. This e-mail is sent to all portal users with authorisation to manage balancing group contracts of the involved BGM.

5.5 Balancing group portfolio

In the "Balancing group portfolio" section, the balancing group links are displayed graphically. Here, balancing group links are displayed starting from the selected balancing group to higher-level and lower-level balancing groups.

Your own balancing groups are shown in yellow. Balancing groups of a third-party Balancing Group Manager are shown in grey.

A dashed connecting line between balancing groups means that a link has already been created but is not yet active due to the start date in the future and may not yet have been approved. A green connecting line means that the link is active.

You can display links from the past that have already been terminated by ticking Show terminated linkings. Terminated links are indicated by a grey connecting line.

Keeping the mouse pointer on a connecting line will flag up information on the relevant link (start and end date, linking ratio, status of approval) via tooltip.

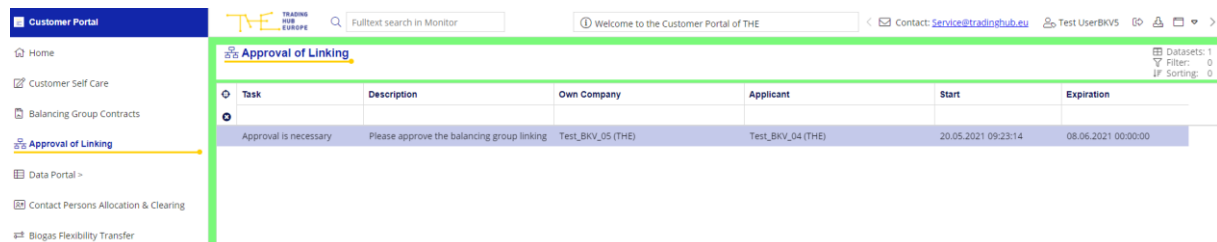

6 Approving BG links

A new or an extension of a balancing group link must be approved by the Balancing Group Manager of the next higher-level balancing group, unless the requesting user is assigned to both companies involved.

The Balancing Group Manager of the higher-level balancing group is informed by e-mail if a new link or the extension of an existing link has been requested by the Balancing Group Manager of the lower-level balancing group. This e-mail is sent to all users who are authorised to conclude and manage balancing group contracts/links. The approval or rejection of a new link or an extension of a link must be made in the menu item "Approval of Linking".

If a link is to be approved/rejected, the task is shown in the menu item "Approval of Linking".

Task	Description	Own Company	Applicant	Start	Expiration
Approval is necessary	Please approve the balancing group linking	Test_BKV_05 (THE)	Test_BKV_04 (THE)	20.05.2021 09:23:14	08.06.2021 00:00:00

The task remains in the “to be approved/rejected” status for 10 business days from the time of creation. If the task is not processed within this period, it is automatically rejected. The link is therefore not made and must be requested again if necessary.

Double-clicking on the task will open a new window in which further details on the new link/extension (balancing group codes affected, applicant, creation time, start and end date of the link, percentage linking ratio) can be viewed.

Process - Detail window

Approval of balancing group linkings

Applicant

Company: Test_BKV_04 (THE)

DVGW code: 9809000400099

User: Test UserBKV4

Date: 2021-05-20 09:23:14

New linking

Higher-level balancing group: THE0BFH690250000

Subordinate balancing group: THE0BFL990080000

Start of linking: 2021-10-01 06:00:00

End of linking: 2021-11-01 06:00:00

Linking ratio in %: 100

Reason for refusal

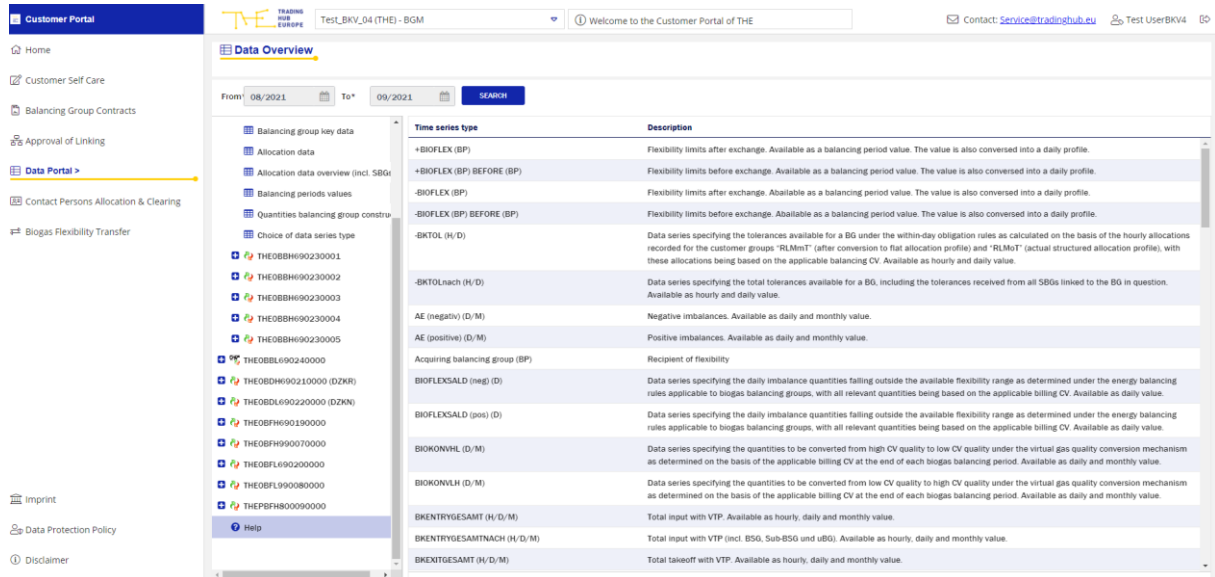

Approve Refuse Cancel

After approval or rejection of the link, the task is automatically removed. If the link is rejected by the higher-level Balancing Group Manager, the latter must also provide a reason for the rejection.

Provided you connect your own balancing groups with each other, i.e. the higher-level balancing group is your own balancing group, the intermediate approval step is not required. Approval is also not required if you have access to the balancing groups of the higher-level Balancing Group Manager in the portal, e.g. due to an existing service relationship. In this case, you will not receive a task for these links in the menu item "Approval of Linking".

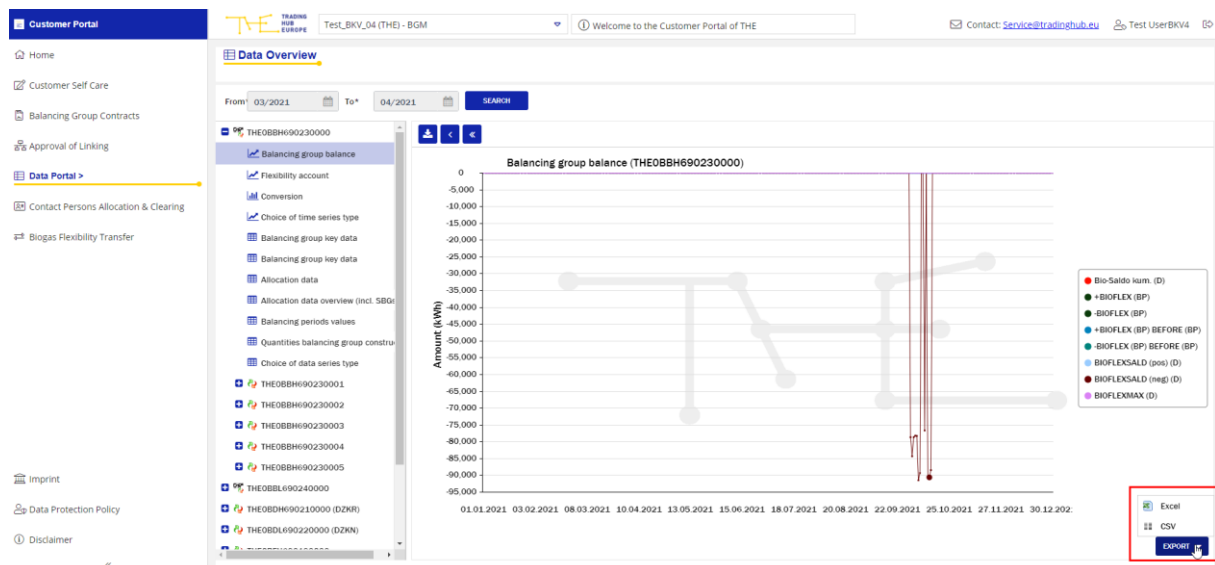

7 Data Portal

In the Data Overview section of the Data Portal, you can click on "Help" (at the very bottom) for a page showing details about the data series types displayed in the Data Portal, which are explained here.

Time series type	Description
+BIOFLEX (BP)	Flexibility limits after exchange. Available as a balancing period value. The value is also converted into a daily profile.
+BIOFLEX (BP) BEFORE (BP)	Flexibility limits before exchange. Available as a balancing period value. The value is also converted into a daily profile.
-BIOFLEX (BP)	Flexibility limits after exchange. Available as a balancing period value. The value is also converted into a daily profile.
-BIOFLEX (BP) BEFORE (BP)	Flexibility limits before exchange. Available as a balancing period value. The value is also converted into a daily profile.
SKTOL (H/D)	Data series specifying the tolerances available for a BG under the within-day obligation rules as calculated on the basis of the hourly allocations recorded for the customer groups 'RLMnT' (after conversion to flat allocation profile) and 'RLMnT' (actual structured allocation profile), with these allocations being based on the applicable balancing CV. Available as hourly and daily value.
SKTOLnach (H/D)	Data series specifying the total tolerances available for a BG, including the tolerances received from all SBGs linked to the BG in question. Available as hourly and daily values.
AE (negativ) (D/M)	Negative imbalances. Available as daily and monthly value.
AE (positive) (D/M)	Positive imbalances. Available as daily and monthly value.
Acquiring balancing group (BP)	Recipient of flexibility
BIOFLEXSALD (neg) (D)	Data series specifying the daily imbalance quantities falling outside the available flexibility range as determined under the energy balancing rules applicable to biogas balancing groups, with all relevant quantities being based on the applicable billing CV. Available as daily value.
BIOFLEXSALD (pos) (D)	Data series specifying the daily imbalance quantities falling outside the available flexibility range as determined under the energy balancing rules applicable to biogas balancing groups, with all relevant quantities being based on the applicable billing CV. Available as daily value.
BIKONVHL (D/M)	Data series specifying the quantities to be converted from high CV quality to low CV quality under the virtual gas quality conversion mechanism as determined on the basis of the applicable billing CV at the end of each biogas balancing period. Available as daily and monthly value.
BIKONVLH (D/M)	Data series specifying the quantities to be converted from low CV quality to high CV quality under the virtual gas quality conversion mechanism as determined on the basis of the applicable billing CV at the end of each biogas balancing period. Available as daily and monthly value.
BKENTRYGESAMT (H/D/M)	Total input with VTP. Available as hourly, daily and monthly value.
BKENTRYGESAMTNACH (H/D/M)	Total input with VTP (incl. B5G, Sub-B5G and uB5G). Available as hourly, daily and monthly value.
BKEXITGESAMT (H/D/M)	Total takeoff with VTP. Available as hourly, daily and monthly value.

Apart from the display function, the Data Overview has an export function for all charts and tables provided. Clicking on EXPORT allows you to export the charts in tabular form as an Excel and/or CSV file.

EXPORT

7.1 Natural gas charts

The Data Overview also allows you to view the details of your balancing groups as charts. A total of five different charts are available for natural gas balancing groups.

7.1.1 Balancing group balance

What is displayed here are the total inputs (ENTRYSUM), offtakes (EXITSUM), the balancing group balance (BKSALD (Bil.)) that is relevant for the calculation of daily imbalance charges, as well as the balancing group balance including the RLM quantity difference (BKSALD (Abr.)) – initially shown as daily values (D) when a month or more than one month is selected. Hourly values can be selected in the display for a maximum period of one month.

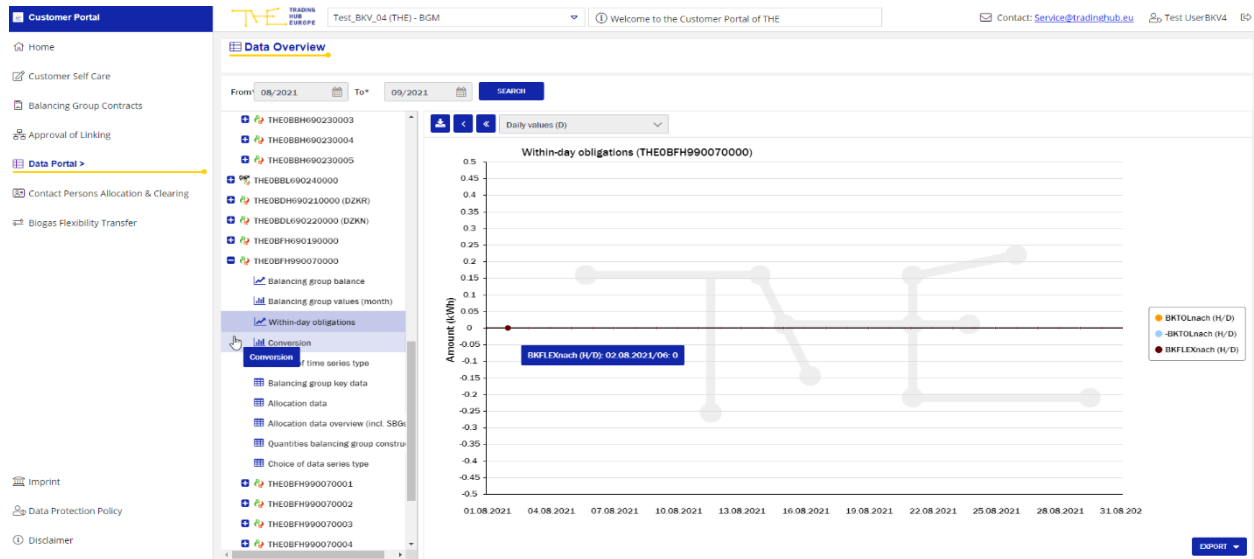

Important: The data export for a maximum period of one month always contains only the hourly values, not the daily values. It is not possible to export daily values for one single month.

7.1.2 Balancing group values (month)

What is displayed here are the balancing group balances that are subject to daily imbalance charges (BKSALD (Bil.)), the balancing group balances that are subject to daily imbalance charges including the balances from subordinate balancing groups (BKSALDNACH (Bil.)), the daily imbalance quantity from the undersupply (negative daily imbalance quantity) and the daily imbalance quantity from oversupply (positive daily imbalance quantity), the quantities subject to RLM and SLP charges including SBGs (RLMUML, SLPUML), the RLM quantity differences (BKRLMDIF), the RLM quantity differences including SBGs (BKRLMDIFnach), the balancing group balances including RLM quantity differences (BKSALD (Abr.)), the balancing group balance including RLM quantity differences and the balances from subordinate balancing groups (BKSALDNACH (Abr.)) and the cumulative sum of the absolute values of the hourly imbalance quantities falling outside the tolerance limits available under the within-day obligation rules including subordinate balancing groups (BKFLEXnach). All of these values are also shown as monthly values and can be exported.

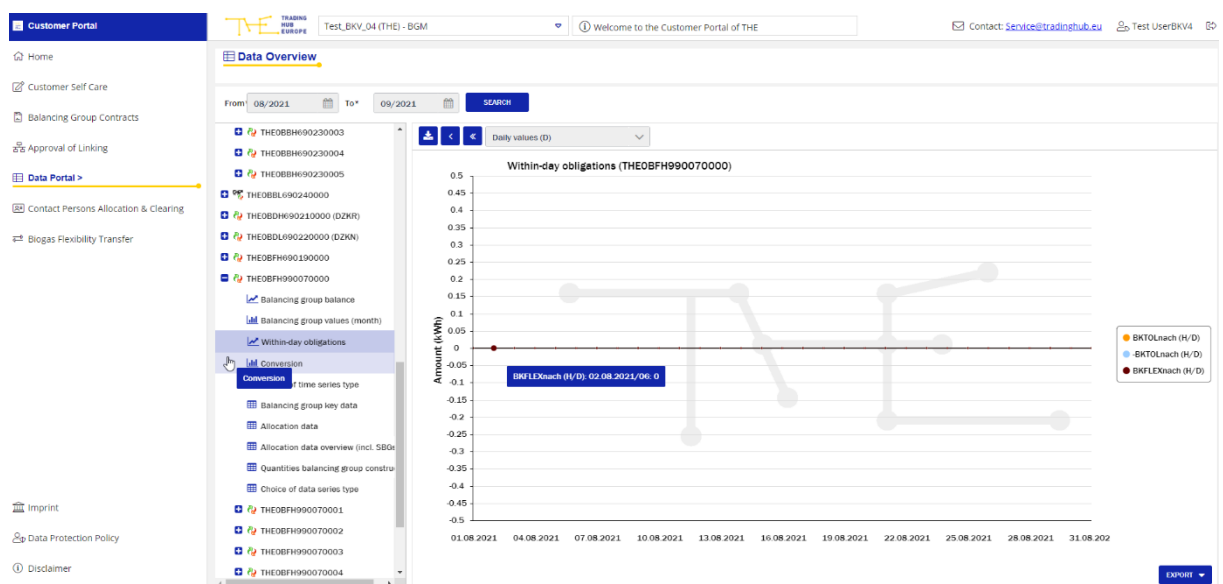

7.1.3 Within-day obligations

This chart shows the tolerance for within-day obligations (BKTOLnach, -BKTOLnach) and the financial flexibility quantity (BKFLEXnach), each including the tolerance overruns from any subordinate balancing groups. The values are initially shown as daily values (D) when a month or more than one month is selected. Hourly values can be selected in the display for a maximum period of one month.

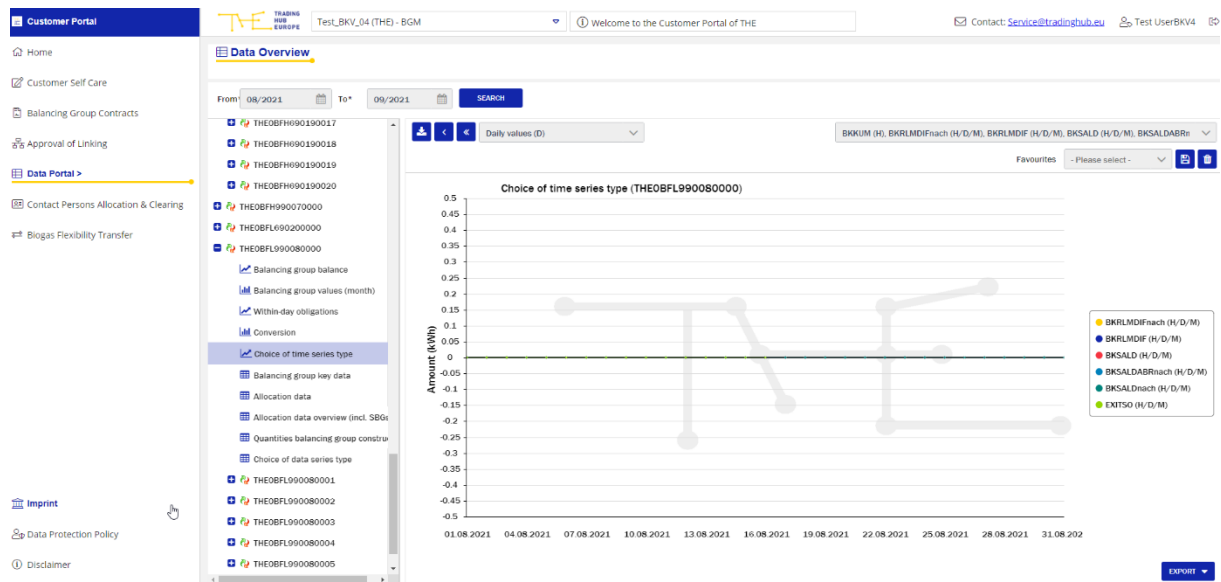

Important: The data export for a maximum period of one month always contains only the hourly values, not the daily data values. It is not possible to export daily values for one single month.

7.1.4 Conversion

This is where the conversion quantity in both directions (KONVHL, KONVLH) and the balancing group balance for H-gas and L-gas (HSALD, LSALD) (each including the SBG) as well as the quantity subject to conversion charges including the SBG (KONVUM) are shown. All values are displayed as monthly values and can be exported.

7.1.5 Free selection of data series

This is where you can create your own charts for the data series selected. A maximum of 10 data series types can be selected at any one time. Each selection may be exported.

The following data series are available:

- Hourly values:**
 BKFLEX, BKFLEXNACH, BKKUM, BKKUMNACH, BKRLMDIF, BKRLMDIFNACH, BKSALD (ABR.), BKSALD (Bil.), BKSALDNACH (ABR.), BKSALDNACH (Bil.), ENTRYH2, ENTRYSO, EXITSO, HSALD, LSALD, RLMMTB (ABR.), RLMMTB RLMoT (ABR.), RLMoT, SLPANA, SLPSYN, VHPENTRY, VHPENTRYNACH, VHPEXIT, VHPEXITNACH
- Daily values:**
 Daily Imbalance Quantity (AE) negative, Daily Imbalance Quantity (AE) positive
 BKFLEX, BKFLEXNACH, BKRLMDIF, BKRLMDIFNACH, BKSALD (ABR.), BKSALD (Bil.), BKSALDNACH (ABR.), BKSALDNACH (Bil.), ENTRYH2, ENTRYSO, EXITSO, HSALD, LSALD, RLMMTB (ABR.), RLMMTB, RLMoT (ABR.), RLMoT, SLPANA, SLPSYN, VHPENTRY, VHPENTRYNACH, VHPEXIT, VHPEXITNACH
- Monthly values:**
 BIOFLEX, -BIOFLEX, BIOFLEX VOR, -BIOFLEX VOR, BKRLMDIF, BKSALD (Abr.), BKRLMDIFnach, BKSALD (Bil.), BKSALDNACH (Abr.), BKSALDNACH (Bil.) ,

ENTRYBIO, ENTRYSO, EXITSO, RLMMTB, RLMMTB_ABR, RLMOT_ABR, RLMOT, SLPANA, RLMUML, SLPSYN, SLPUML, VHPENTRY, VHPENTRYNACH, VHPEXIT, VHPEXITNACH, KONVHL, KONVLH, KONVUM

7.2 Biogas charts

A total of four different charts are available for biogas balancing groups.

7.2.1 Balancing group balance

This chart shows – for biogas balancing groups – the cumulated balancing group balance within the bioflex framework (bio-balance cum.), the flexibility framework relevant to this biogas balancing group incl. quantities from flex swaps executed (+BIOFLEX and -BIOFLEX), the flexibility framework before the biogas flexibility swap (+BIOFLEX (BP) VOR), (-BIOFLEX (BP)VOR), the flexibility overrun from any under- and oversupply (BIOFLEXSALD (pos.)), (BIOFLEXSALD (neg.)) and the maximum utilisation of flexibility (BIOFLEXMAX). The daily values of the selected period are always shown first. However, the data export always automatically contains all values for the entire balancing period.

7.2.2 Flexibility account

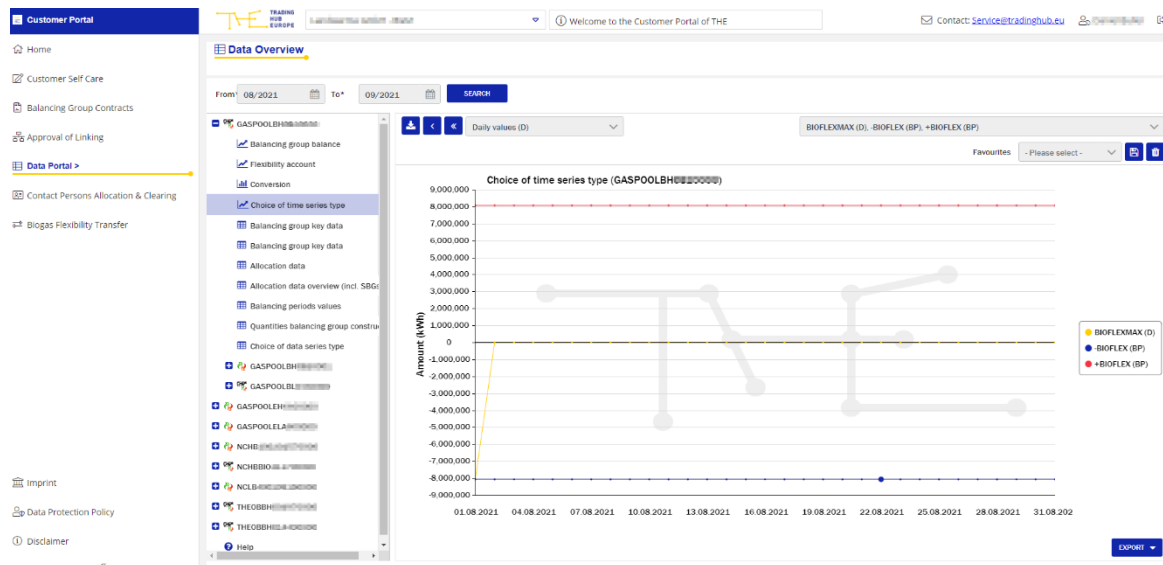

This chart shows the cumulative balancing group balance within the bio-flex framework (bio balance cumulative), the flexibility framework relevant to this biogas balancing group including quantities from flex swaps (+BIOFLEX and -BIOFLEX), the flexibility framework before the biogas flexibility swap (+BIOFLEX (BP) VOR), (-BIOFLEX (BP)VOR), as well as the bio balancing group balance including SBG (BIOSALDNACH (Abr.)). The daily values of the selected period are always shown first. However, the data export always automatically contains all values for the entire balancing period.

7.2.3 Conversion

This is where the balancing group balances for H-gas and L-gas (HSALD, LSALD) (each including SBG) and the quantity subject to conversion neutrality charges including SBG (KONVUM) are shown. All values are displayed as monthly values and can be exported.

7.2.4 Free data series selection

This is where you can create individual charts for the data series you have selected. A maximum of 10 data series types can be selected at any one time. Each selection may be exported.

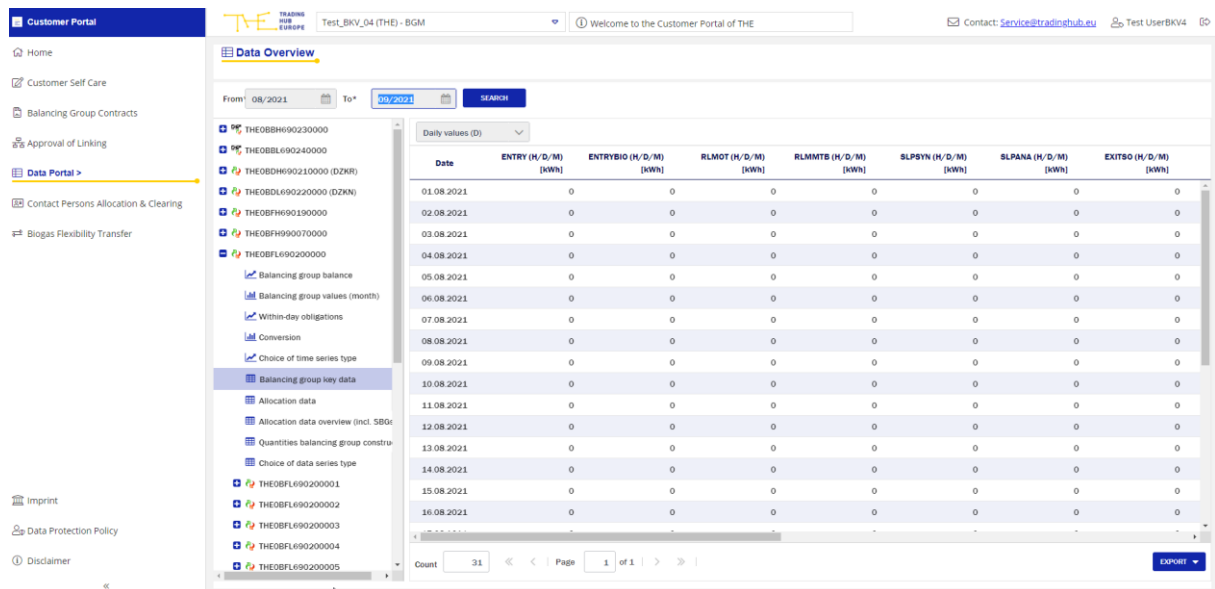

The following data series are available:

- Hourly values:**
 BKFLEX, BKFLEXNACH, BKKUM, BKKUMNACH, BKRLMDIF; BKRLMDIFNACH, BKSALD, BKSALDNACH; ENTRYBIO; ENTRYSO, EXITSO, RLMMTB, RLMMTB_ABR, RLMOT_ABR, RLMOT, SLPANA, SLPSYN, VHPENTRY, VHPENTRYNACH, VHPEXIT, VHPEXITNACH
- Daily values:**
 BIOFLEX, -BIOFLEX, BIOFLEX VOR, -BIOFLEX VOR, BIOFLEXMAX, BIOFLEXSALD (pos), BIOFLEXSALD (neg), BKFLEX, BKFLEXNACH, BKRLMDIF, BKRLMDIF, BKSALD (Abr.), BKRLMDIFnach, BKSALD (Bil.), BKSALDNACH (Abr.), BKSALDNACH (Bil.), ENTRYBIO, ENTRYSO), EXITSO, RLMMTB, RLMMTB_ABR, RLMOT_ABR, RLMOT, SLPANA, SLPSYN, VHPENTRY, VHPENTRYNACH, VHPEXIT, VHPEXITNACH
- Monthly values:**
 BIOFLEX, -BIOFLEX, BIOFLEX VOR, -BIOFLEX VOR, BKRLMDIF, BKSALD (Abr.), BKRLMDIFnach, BKSALD (Bil.), BKSALDNACH (Abr.), BKSALDNACH (Bil.), ENTRYBIO, ENTRYSO, EXITSO, RLMMTB, RLMMTB_ABR, RLMOT_ABR, RLMOT, SLPANA, RLMUML, SLPSYN, SLPUML, VHPENTRY, VHPENTRYNACH, VHPEXIT, VHPEXITNACH, KONVHL, KONVLH, KONVUM

7.3 Natural gas tables

Apart from the charts, the Data Overview provides the data in tabular form. A total of six tabular presentations are available for natural gas balancing groups.

7.3.1 Balancing group figures

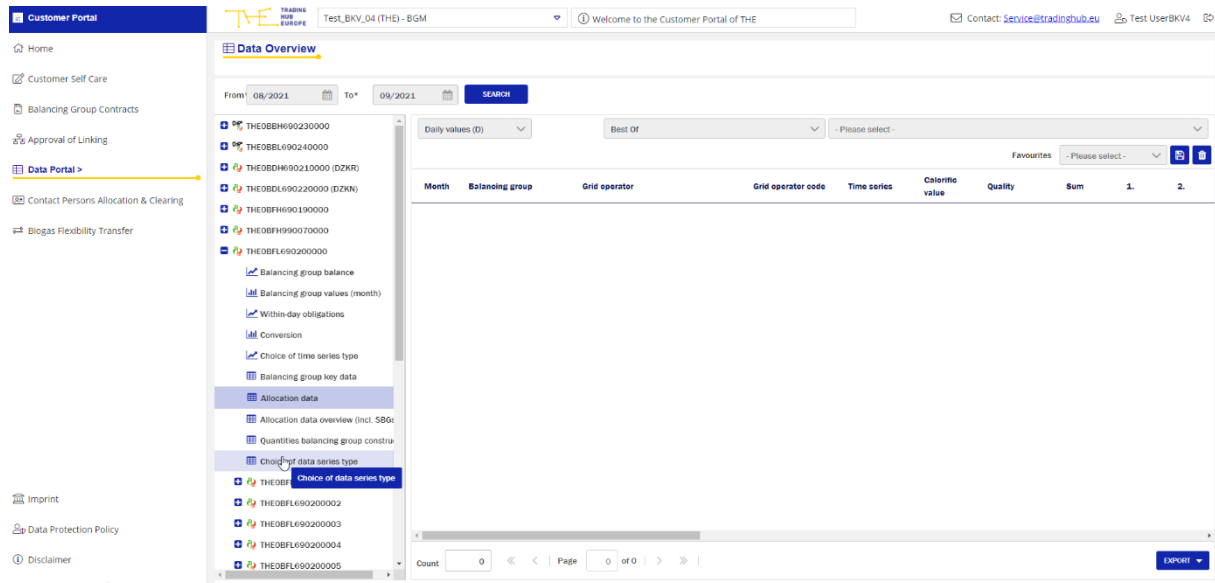

The screenshot shows the 'Data Overview' page in the Trading Hub Europe customer portal. The interface includes a navigation menu on the left, a search bar at the top, and a table of data. The table is titled 'Daily values (D)' and shows data for the month of August 2021. The columns represent different balancing group types: ENTRY (H/D/M), ENTRYBIO (H/D/M), RLMOT (H/D/M), RLMMTB (H/D/M), SLPSTN (H/D/M), SLPANA (H/D/M), and EXITSO (H/D/M). The data shows zero values for all entries from 01.08.2021 to 16.08.2021. The interface also includes a sidebar with various options like 'Balancing group balance', 'Balancing group values (month)', 'Within-day obligations', 'Conversion', and 'Choice of time series type'. The bottom of the table shows a count of 31 items and a page indicator 'Page 1 of 1'.

Date	ENTRY (H/D/M) [kWh]	ENTRYBIO (H/D/M) [kWh]	RLMOT (H/D/M) [kWh]	RLMMTB (H/D/M) [kWh]	SLPSTN (H/D/M) [kWh]	SLPANA (H/D/M) [kWh]	EXITSO (H/D/M) [kWh]
01.08.2021	0	0	0	0	0	0	0
02.08.2021	0	0	0	0	0	0	0
03.08.2021	0	0	0	0	0	0	0
04.08.2021	0	0	0	0	0	0	0
05.08.2021	0	0	0	0	0	0	0
06.08.2021	0	0	0	0	0	0	0
07.08.2021	0	0	0	0	0	0	0
08.08.2021	0	0	0	0	0	0	0
09.08.2021	0	0	0	0	0	0	0
10.08.2021	0	0	0	0	0	0	0
11.08.2021	0	0	0	0	0	0	0
12.08.2021	0	0	0	0	0	0	0
13.08.2021	0	0	0	0	0	0	0
14.08.2021	0	0	0	0	0	0	0
15.08.2021	0	0	0	0	0	0	0
16.08.2021	0	0	0	0	0	0	0

This is where the aggregated hourly, daily and monthly values of different data series types balanced in this balancing group are shown. The data series types are preset by default and cannot be selected.

The hourly and daily values can be exported while the monthly values are not available for export.

7.3.2 Allocation data

The screenshot shows the 'Data Overview' interface. On the left, a sidebar lists various data categories, with 'Allocation data' selected. The main area shows a search filter for 'Daily values (D)' and 'Best of' quality. Below this is a table with the following columns: Month, Balancing group, Grid operator, Grid operator code, Time series, Calorific value, Quality, and Sum. The table is currently empty, and a 'Count' of 0 is displayed at the bottom.

In the "Allocation data" table you can view the values allocated by the network operators in the selected balancing group on an hourly or daily basis.

In the upper line you can select the granularity (daily values or hourly values), the qualities and the data series types you want to view (in each case, multiple selections can be made by clicking on the qualities, which can be deselected in the same way). The initial screen always shows the "Daily values", the "Best of" quality and no data series types first.

The selected views can be exported.

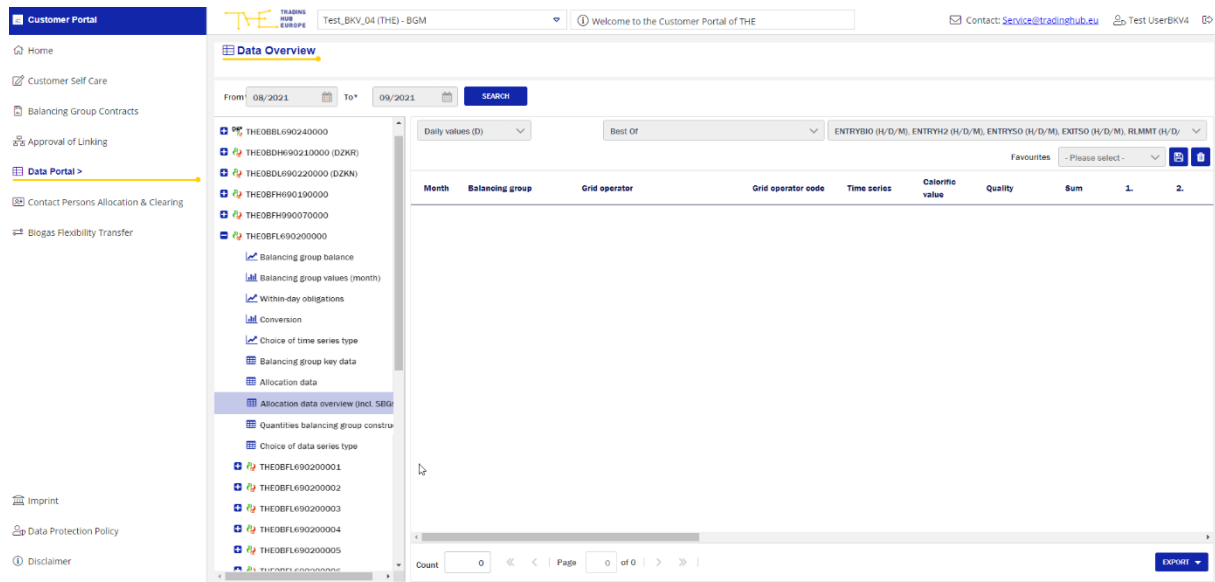

You have the option of saving your own favourites. When you have selected the granularity, quality and data series types, you can select a name for your favourite and confirm your choice by clicking Save. If you no longer need your favourites, they can be removed by clicking Delete.

Meaning of the qualities:

- The "vorläufig" quality refers to the within-day RLM allocation to D (first data delivery comprises 6 hourly values, updated by a second data delivery comprising 9 hourly values).
- The "korrigiert" quality denotes the M+12 messages (RLM, EntrySo, ExitSo, EntryBio, EntryH2, EntryFLG) and the M+21 (system IP).
- The "endgültig" quality denotes the D-1 message in the SLP area and the D+1 message in the area of physical points.

- The "Ersatzwert" quality denotes substitute values formed by THE in the SLP area.
- The "Hilfswert" quality denotes substitute values formed by THE in the RLM area for the RLM quantity corrected by using the gross calorific value used for billing (billing CV).
- The "Clearing" quality comprises any clearing allocations transmitted.
- The "Best of" quality is a track generated by the system, which basically contains the most recent value (at the time of the query).

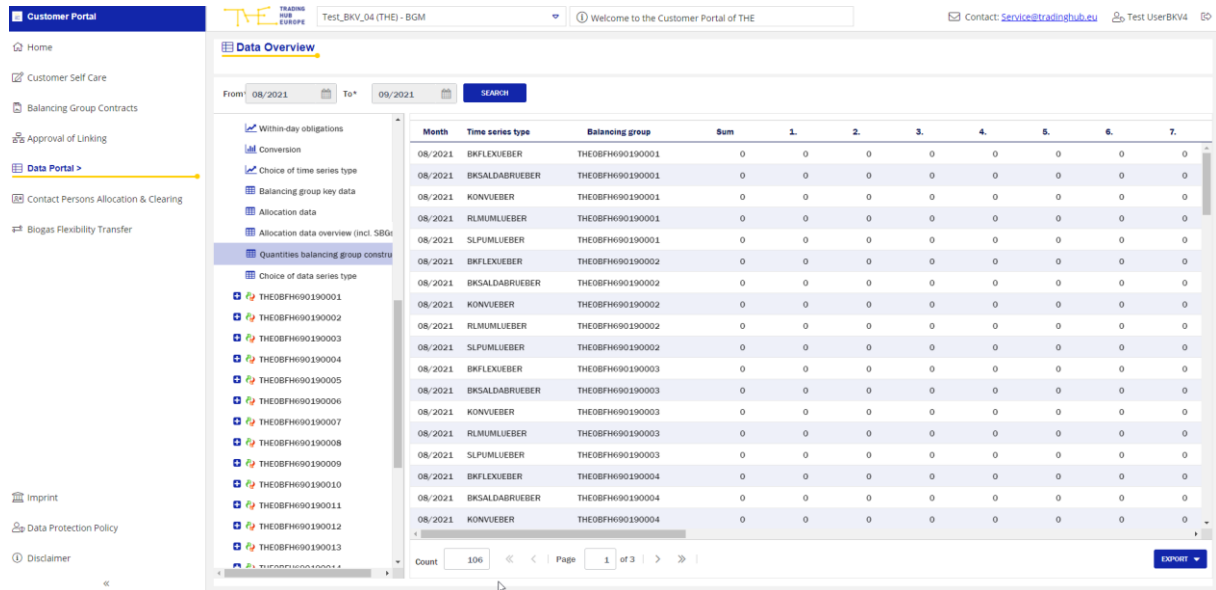

7.3.3 Allocation overview (incl. BSGs)

The screenshot shows the 'Data Overview' section of the THE Customer Portal. The interface includes a navigation menu on the left, a search bar at the top, and a table of allocation data. The table has columns for Month, Balancing group, Grid operator, Grid operator code, Time series, Calorific value, Quality, and Sum. The 'Quality' column is currently set to 'Best Of'. The table is currently empty, and the 'Count' at the bottom indicates 0 results.

As in the "Allocation data" table, you can view the values allocated by the network operators in the selected balancing group and all subordinate balancing groups belonging to the balancing group on an hourly or daily basis after you have made your selection.

7.3.4 Balancing group portfolio quantities

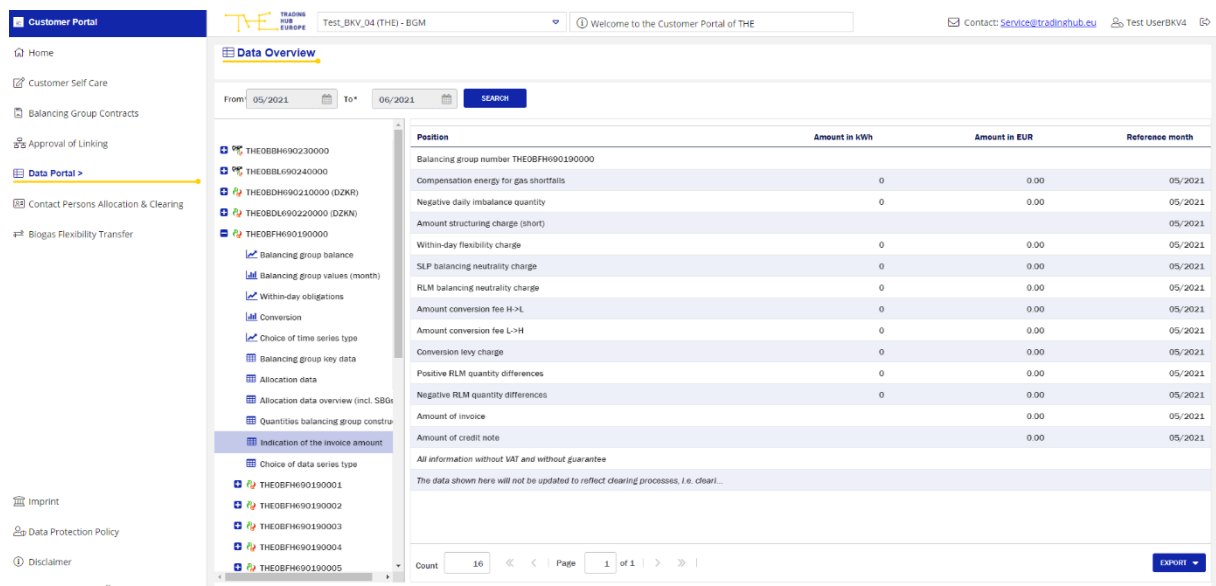

The screenshot shows the 'Data Overview' section of the Customer Portal. The left sidebar contains navigation links such as 'Home', 'Customer Self Care', 'Balancing Group Contracts', 'Approval of Linking', 'Data Portal >', 'Contact Persons Allocation & Clearing', and 'Biogas Flexibility Transfer'. The main content area features a search bar with 'From: 08/2021' and 'To: 09/2021'. Below the search bar is a table with the following columns: 'Month', 'Time series type', 'Balancing group', 'Sum', and seven numbered columns (1-7). The table lists various balancing groups and their corresponding values for the month of 08/2021. At the bottom of the table, there is a 'Count' field showing '106' and a 'Page 1 of 3' indicator, along with an 'EXPORT' button.

What is displayed here are the balancing group balances that are relevant for the calculation of daily imbalance charges (BKSALDUEBER), the balancing group balances including RLM differential quantities (BKSALDABRUEBER), the quantities subject to SLP and RLM neutrality charges (RLMUMLUEBER, SLPUMLUEBER) and the quantities subject to conversion neutrality charges (KONVUEBER) transferred from the SBGs.

The values are displayed as daily and monthly values and can be exported.

7.3.5 Indicative invoice amount

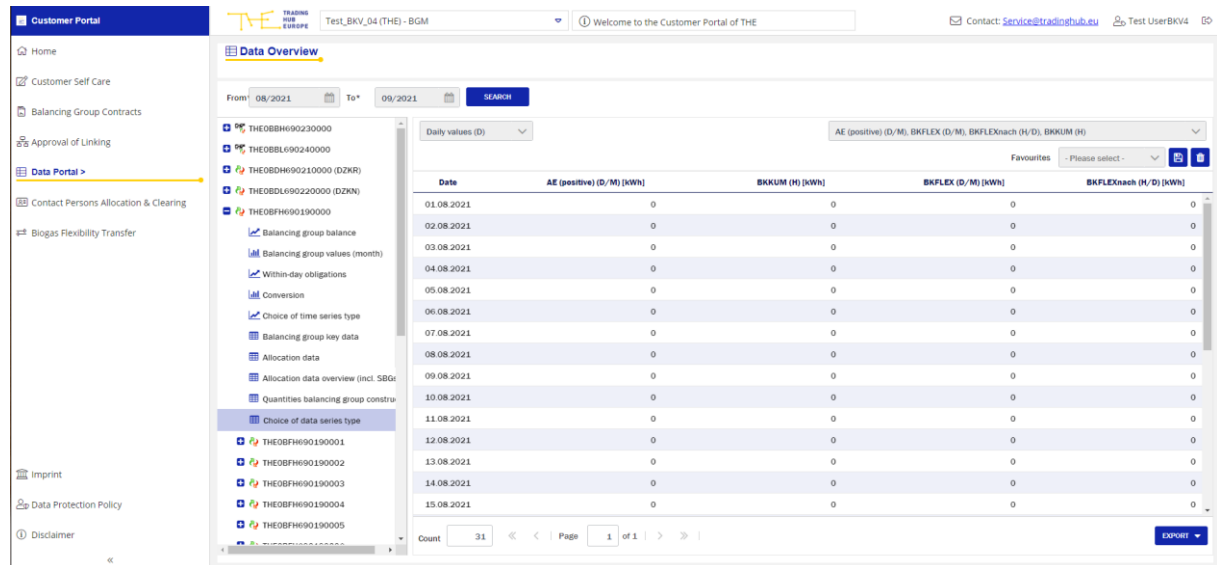

The screenshot shows the 'Data Overview' section of the Customer Portal. The left sidebar contains navigation links such as 'Home', 'Customer Self Care', 'Balancing Group Contracts', 'Approval of Linking', 'Data Portal >', 'Contact Persons Allocation & Clearing', and 'Biogas Flexibility Transfer'. The main content area features a search bar with 'From: 05/2021' and 'To: 06/2021'. Below the search bar is a table with the following columns: 'Position', 'Amount in kWh', 'Amount in EUR', and 'Reference month'. The table lists various positions and their corresponding values for the month of 05/2021. At the bottom of the table, there is a 'Count' field showing '16' and a 'Page 1 of 1' indicator, along with an 'EXPORT' button.

This is where you find information about the amount expected for the relevant balancing group invoice for the relevant delivery month at each billing balancing group.

Please note: The information comes without any guarantee and will not be updated if there is a clearing process.

You can only view this submenu item from M+15WT until the end of the clearing period (M+2M-10WT-1KT) for delivery month M.

7.3.6 Free data series selection

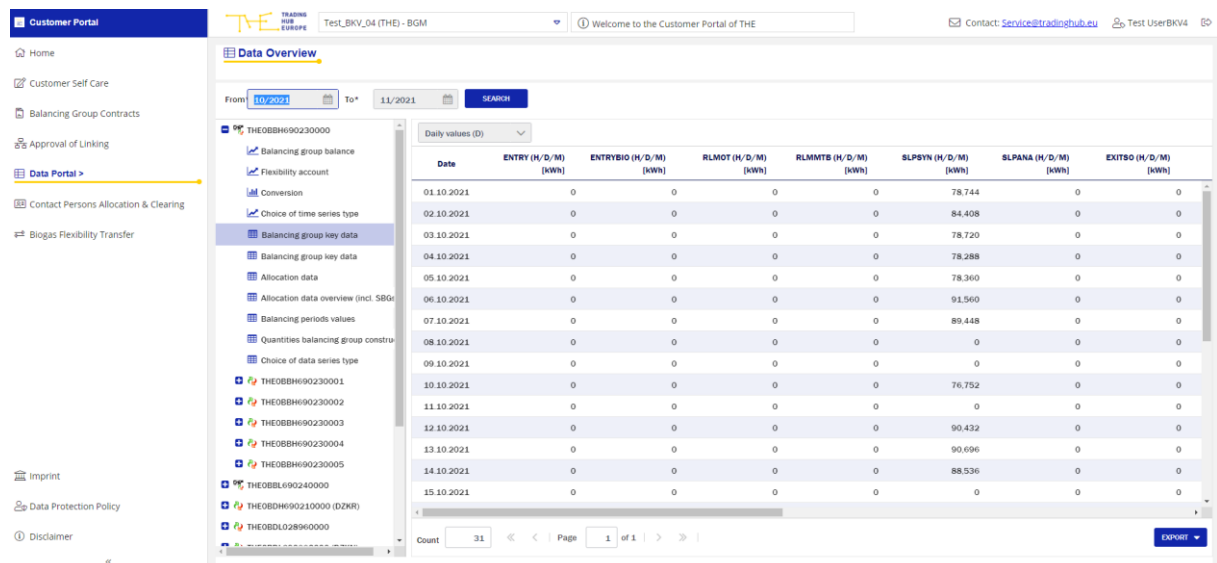

The screenshot shows the 'Data Overview' page in the Customer Portal. The left sidebar contains a navigation menu with 'Data Portal' selected. The main content area shows a date range from 08/2021 to 09/2021. A submenu titled 'Choice of data series type' is open, listing various data series. The main table displays 'Daily values (D)' for the period 08/2021 to 09/2021. The table has columns for 'Date', 'AE (positive) (D/M) [kWh]', 'BKUM (H) [kWh]', 'BKFLX (D/M) [kWh]', and 'BKFLXnach (H/D) [kWh]'. All values in the table are 0.

The functions are the same as in the chart (section 4.1.5).

7.4 Biogas tables

A total of seven tabular views are available for biogas balancing groups.

7.4.1 Balancing group figures

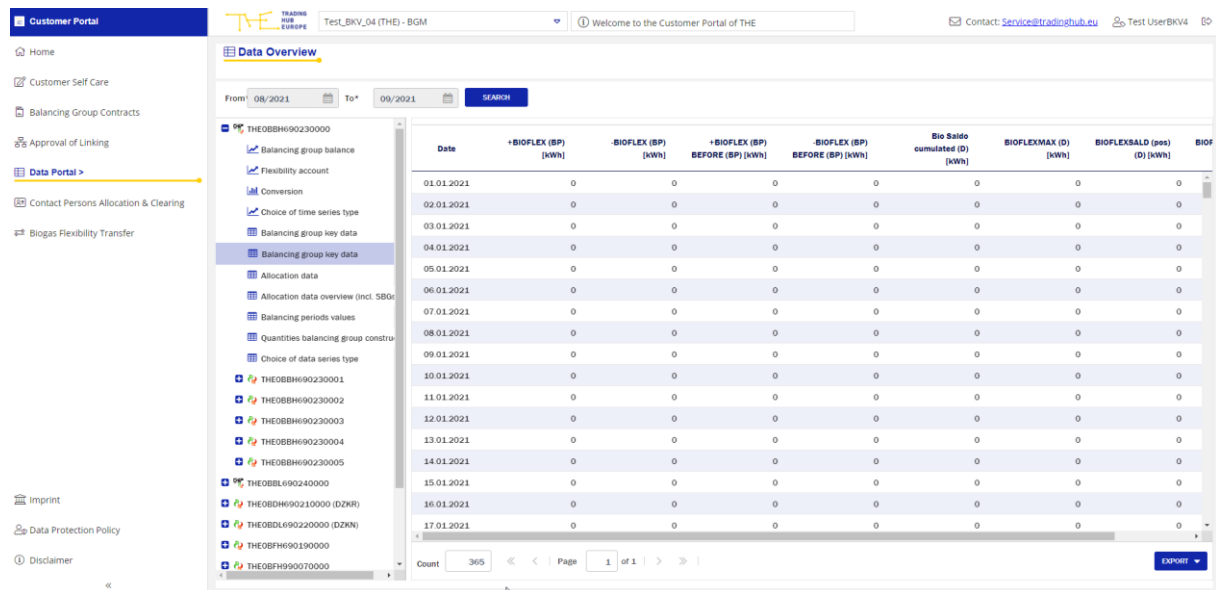

The screenshot shows the 'Data Overview' page in the Customer Portal. The left sidebar contains a navigation menu with 'Data Portal' selected. The main content area shows a date range from 10/2021 to 11/2021. A submenu titled 'Balancing group key data' is open, listing various data series. The main table displays 'Daily values (D)' for the period 10/2021 to 11/2021. The table has columns for 'Date', 'ENTRY (H/D/M) [kWh]', 'ENTRYBIO (H/D/M) [kWh]', 'RLMOT (H/D/M) [kWh]', 'RLMMTB (H/D/M) [kWh]', 'SLPSyn (H/D/M) [kWh]', 'SLPANA (H/D/M) [kWh]', and 'EXITSO (H/D/M) [kWh]'. Values are shown for dates from 01.10.2021 to 15.10.2021.

This is where the aggregated hourly, daily and monthly values of different data series types balanced for this balancing group are shown. The data series types are preset by default and cannot be selected.

The hourly and daily values can be exported, the monthly values are not available for export.

7.4.2 Balancing group figures (Total)

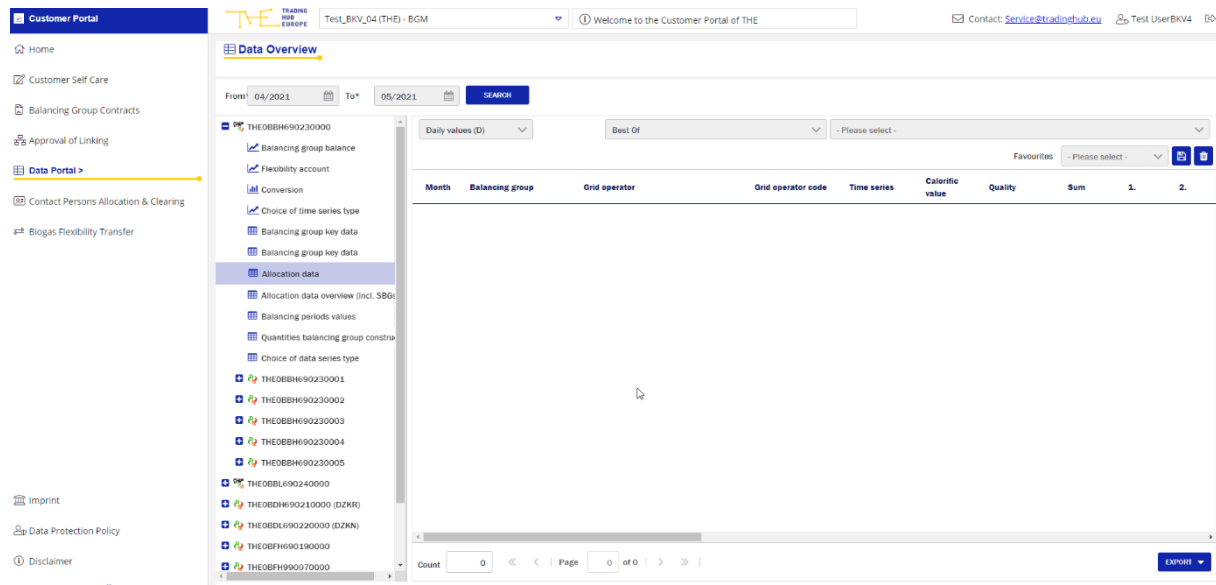

The screenshot shows the 'Data Overview' page in the Customer Portal. The left sidebar contains navigation options like 'Home', 'Customer Self Care', 'Balancing Group Contracts', 'Approval of Linking', 'Data Portal >', 'Contact Persons Allocation & Clearing', and 'Biogas Flexibility Transfer'. The main content area displays a table with the following columns: Date, +BIOFLEX (BP) [kWh], -BIOFLEX (BP) [kWh], +BIOFLEX (BP) BEFORE (BP) [kWh], -BIOFLEX (BP) BEFORE (BP) [kWh], Bio Sales cumulated (D) [kWh], BIOFLEXMAX (D) [kWh], BIOFLEXSALD (D) [kWh], and BIOF. The table shows data for dates from 01.01.2021 to 17.01.2021, with all values being 0. The page also includes a search bar, date range selector (From: 08/2021, To: 09/2021), and a 'Count' of 365.

Date	+BIOFLEX (BP) [kWh]	-BIOFLEX (BP) [kWh]	+BIOFLEX (BP) BEFORE (BP) [kWh]	-BIOFLEX (BP) BEFORE (BP) [kWh]	Bio Sales cumulated (D) [kWh]	BIOFLEXMAX (D) [kWh]	BIOFLEXSALD (D) [kWh]	BIOF
01.01.2021	0	0	0	0	0	0	0	0
02.01.2021	0	0	0	0	0	0	0	0
03.01.2021	0	0	0	0	0	0	0	0
04.01.2021	0	0	0	0	0	0	0	0
05.01.2021	0	0	0	0	0	0	0	0
06.01.2021	0	0	0	0	0	0	0	0
07.01.2021	0	0	0	0	0	0	0	0
08.01.2021	0	0	0	0	0	0	0	0
09.01.2021	0	0	0	0	0	0	0	0
10.01.2021	0	0	0	0	0	0	0	0
11.01.2021	0	0	0	0	0	0	0	0
12.01.2021	0	0	0	0	0	0	0	0
13.01.2021	0	0	0	0	0	0	0	0
14.01.2021	0	0	0	0	0	0	0	0
15.01.2021	0	0	0	0	0	0	0	0
16.01.2021	0	0	0	0	0	0	0	0
17.01.2021	0	0	0	0	0	0	0	0

This is where the aggregated daily and monthly values for biogas data series are shown. The data series types are preset by default and cannot be selected.

The exports always contain the daily values. It is not possible to export the monthly values.

7.4.3 Allocation overview

The screenshot shows the 'Data Overview' section of the Customer Portal. The left sidebar contains navigation items like 'Home', 'Customer Self Care', 'Balancing Group Contracts', 'Approval of Linking', 'Data Portal >', 'Contact Persons Allocation & Clearing', and 'Biogas Flexibility Transfer'. The main content area shows a search filter for 'Test_BKV_04 (THE) - BGM' and a date range from '04/2021' to '05/2021'. Below this, there are dropdown menus for 'Daily values (D)', 'Best Of', and 'Please select'. A table with columns 'Month', 'Balancing group', 'Grid operator', 'Grid operator code', 'Time series', 'Calorific value', 'Quality', and 'Sum' is visible. The 'Allocation data' section is highlighted in the sidebar, and a list of balancing groups is shown below it.

In the "Allocation data" table you can view the values allocated by the network operators to the selected balancing group on an hourly or daily basis.

In the upper line you can select the granularity (daily values or hourly values), the qualities and the data series types that you want to view (in each case, multiple selections can be made by clicking on the qualities, which can be deselected in the same way). The initial screen always shows the "Daily values", the "Best of" quality and no data series types first.

The selected views can be exported.

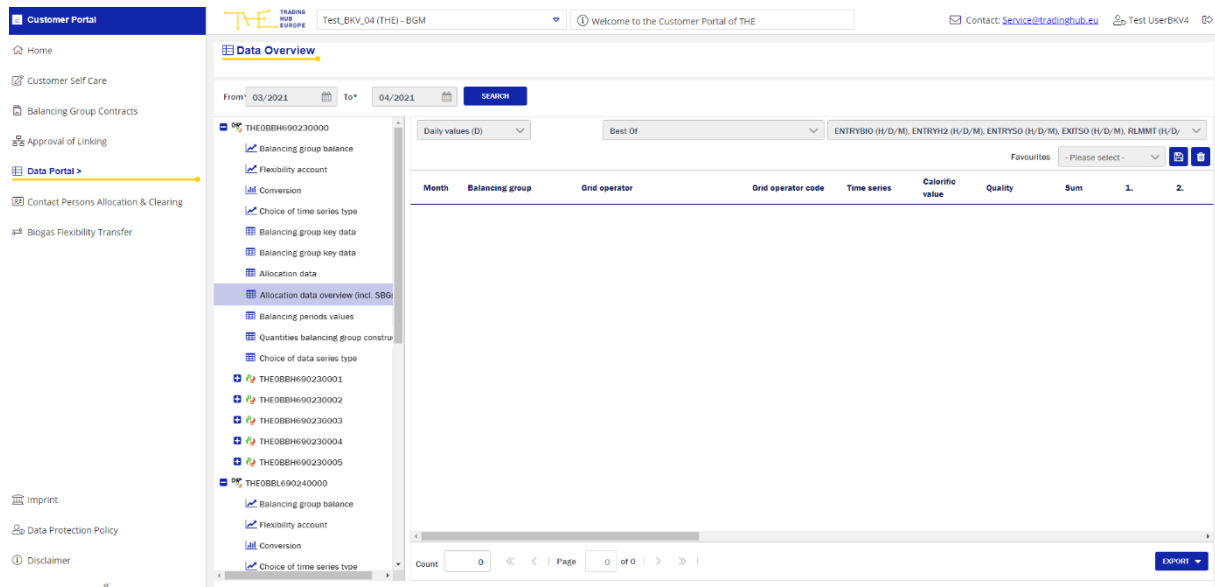

You have the option of saving your own favourites. When you have selected the granularity, quality and data series types, you can select a name for your favourite and confirm your choice by clicking Save. If you no longer need your favourites, they can be removed by clicking Delete.

Meaning of the qualities:

- The "**vorläufig**" quality refers to the within-day RLM allocation of D (first data delivery comprises 6 hourly values, updated by a second data delivery comprising 9 hourly values).
- The "**korrigiert**" quality denotes the M+12 messages (RLM, EntrySo, ExitSo, EntryBio, EntryH2, EntryFLG) and the M+21 (system IP).
- The "**endgültig**" quality denotes the D-1 message in the SLP area and the D+1 message in the area of physical points.

- The **"Ersatzwert"** quality denotes substitute values formed by THE in the SLP area.
- The **"Hilfswert"** quality denotes substitute values formed by THE in the RLM area for the RLM quantity corrected by using the gross calorific value used for billing (billing CV).
- The **"Clearing"** quality comprises any clearing allocations transmitted.
- The **"Best of"** quality is a track generated by the system, which basically contains the most recent value (at the time of the query).

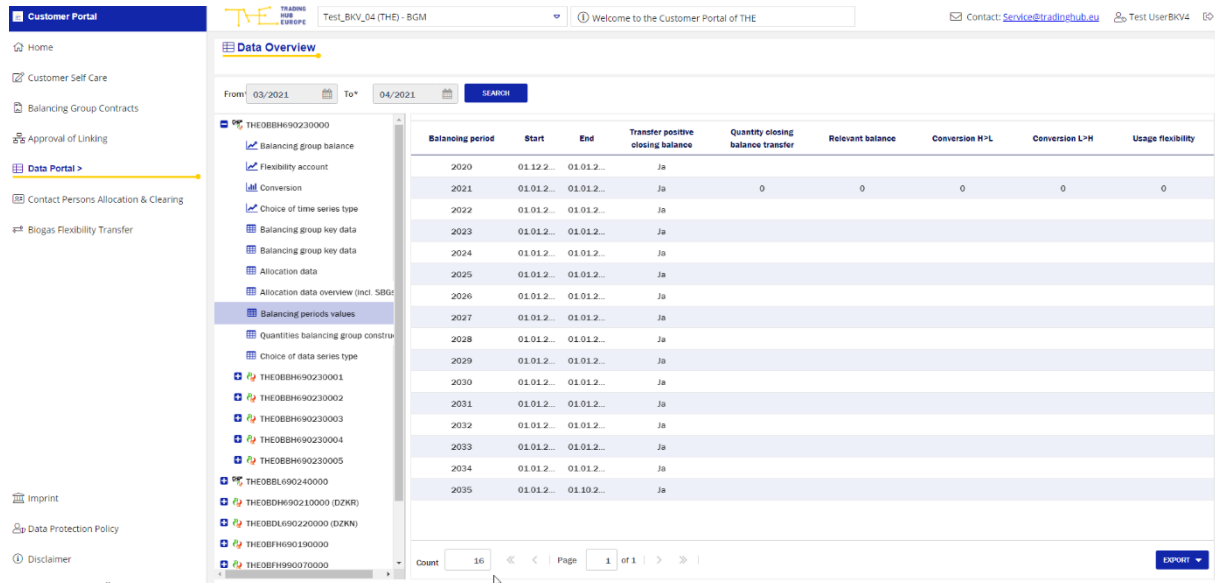

7.4.4 Allocation data overview (incl. BSGs)

The screenshot shows the 'Data Overview' page in the THE Customer Portal. The left sidebar contains a navigation menu with items like 'Home', 'Customer Self Care', 'Balancing Group Contracts', 'Approval of Linking', 'Data Portal >', 'Contact Persons Allocation & Clearing', and 'Biogas Flexibility Transfer'. The main content area displays a search bar with 'Test_BKV_04 (THE) - BGM' and a 'SEARCH' button. Below the search bar, there are filters for 'Daily values (D)' and 'Best Of'. A table is visible with columns: Month, Balancing group, Grid operator, Grid operator code, Time series, Calorific value, Quality, and Sum. The table is currently empty. At the bottom, there is a 'Count: 0' and a 'Page: 0 of 0' indicator, along with an 'EXPORT' button.

As in the "Allocation data" table, you can view the values allocated by the network operators in the selected balancing group and all subordinate balancing groups belonging to the balancing group on an hourly or daily basis after you have made your selection.

7.4.5 Balancing period values

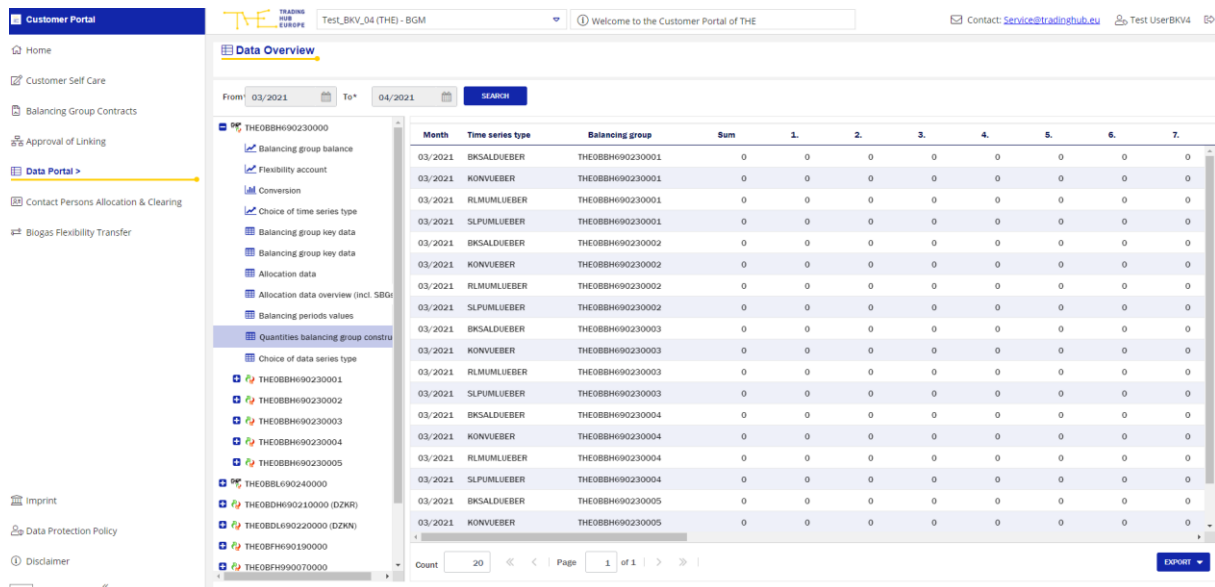

The screenshot shows the 'Data Overview' page for the biogas balancing group THEOBH690230000. The table displays balancing periods from 2020 to 2035. The columns include: Balancing period, Start, End, Transfer positive closing balance, Quantity closing balance transfer, Relevant balance, Conversion H:L, Conversion L:H, and Usage flexibility. The 'Relevant balance' column shows zero values for all periods. The 'Usage flexibility' column shows zero for all periods except 2035, which shows 'Ja'.

Balancing period	Start	End	Transfer positive closing balance	Quantity closing balance transfer	Relevant balance	Conversion H:L	Conversion L:H	Usage flexibility
2020	01.12.2...	01.01.2...	Ja					
2021	01.01.2...	01.01.2...	Ja	0	0	0	0	0
2022	01.01.2...	01.01.2...	Ja					
2023	01.01.2...	01.01.2...	Ja					
2024	01.01.2...	01.01.2...	Ja					
2025	01.01.2...	01.01.2...	Ja					
2026	01.01.2...	01.01.2...	Ja					
2027	01.01.2...	01.01.2...	Ja					
2028	01.01.2...	01.01.2...	Ja					
2029	01.01.2...	01.01.2...	Ja					
2030	01.01.2...	01.01.2...	Ja					
2031	01.01.2...	01.01.2...	Ja					
2032	01.01.2...	01.01.2...	Ja					
2033	01.01.2...	01.01.2...	Ja					
2034	01.01.2...	01.01.2...	Ja					
2035	01.01.2...	01.10.2...	Ja					Ja

What is displayed here are the balancing periods per biogas balancing group, the start and end dates of the balancing period, the information on the transfer of the positive final balance, the final balance transfer quantity, the balance relevant for billing, the conversion and the utilisation of flexibility.

7.4.6 Balancing group portfolio quantities

The screenshot shows the 'Data Overview' page for the biogas balancing group THEOBH690230000. The table displays balancing group balances for various time series types from March 2021. The columns include: Month, Time series type, Balancing group, Sum, and seven numbered columns (1-7). The 'Sum' column shows zero values for all entries. The 'Time series type' column includes BKSALDUEBER, KONVUEBER, RLMUMUEBER, and SLPUMUEBER.

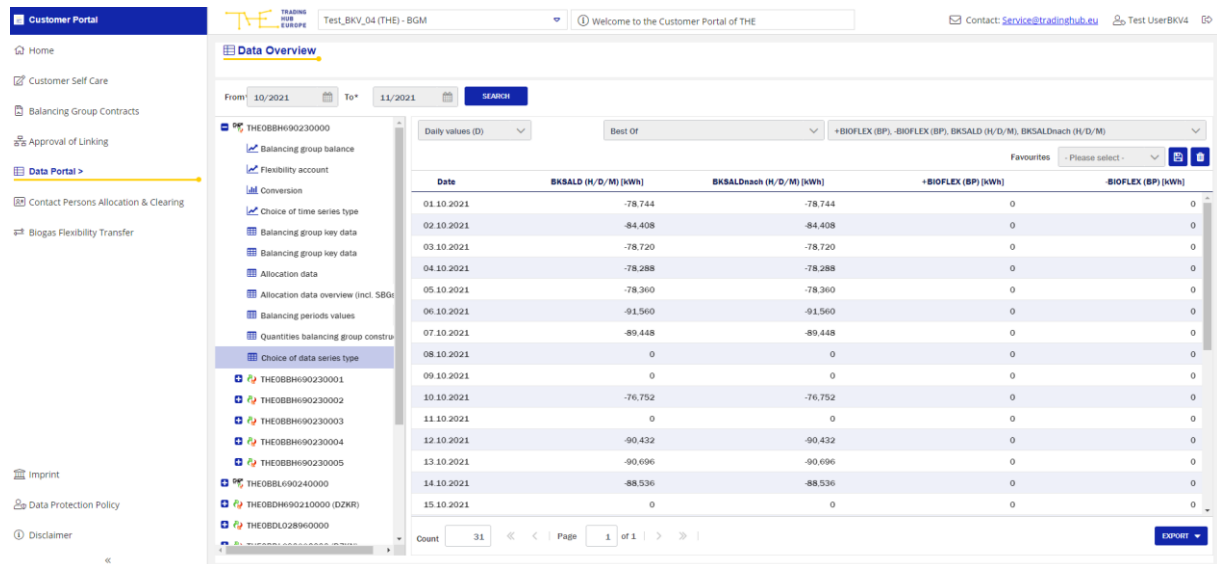

Month	Time series type	Balancing group	Sum	1.	2.	3.	4.	5.	6.	7.
03/2021	BKSALDUEBER	THEOBH690230001	0	0	0	0	0	0	0	0
03/2021	KONVUEBER	THEOBH690230001	0	0	0	0	0	0	0	0
03/2021	RLMUMUEBER	THEOBH690230001	0	0	0	0	0	0	0	0
03/2021	SLPUMUEBER	THEOBH690230001	0	0	0	0	0	0	0	0
03/2021	BKSALDUEBER	THEOBH690230002	0	0	0	0	0	0	0	0
03/2021	KONVUEBER	THEOBH690230002	0	0	0	0	0	0	0	0
03/2021	RLMUMUEBER	THEOBH690230002	0	0	0	0	0	0	0	0
03/2021	SLPUMUEBER	THEOBH690230002	0	0	0	0	0	0	0	0
03/2021	BKSALDUEBER	THEOBH690230003	0	0	0	0	0	0	0	0
03/2021	KONVUEBER	THEOBH690230003	0	0	0	0	0	0	0	0
03/2021	RLMUMUEBER	THEOBH690230003	0	0	0	0	0	0	0	0
03/2021	SLPUMUEBER	THEOBH690230003	0	0	0	0	0	0	0	0
03/2021	BKSALDUEBER	THEOBH690230004	0	0	0	0	0	0	0	0
03/2021	KONVUEBER	THEOBH690230004	0	0	0	0	0	0	0	0
03/2021	RLMUMUEBER	THEOBH690230004	0	0	0	0	0	0	0	0
03/2021	SLPUMUEBER	THEOBH690230004	0	0	0	0	0	0	0	0
03/2021	BKSALDUEBER	THEOBH690230005	0	0	0	0	0	0	0	0
03/2021	KONVUEBER	THEOBH690230005	0	0	0	0	0	0	0	0

What is displayed here are the balancing group balances that are relevant for the calculation of daily imbalance charges (BKSALDUEBER), balancing group balances including RLM differential quantities (BKSALDABRUEBER), the quantities subject to SLP

and RLM neutrality charges (RLMUMLUEBER, SLPUMLUEBER) and the quantities subject to conversion neutrality charges (KONVUEBER) transferred from the SBG.

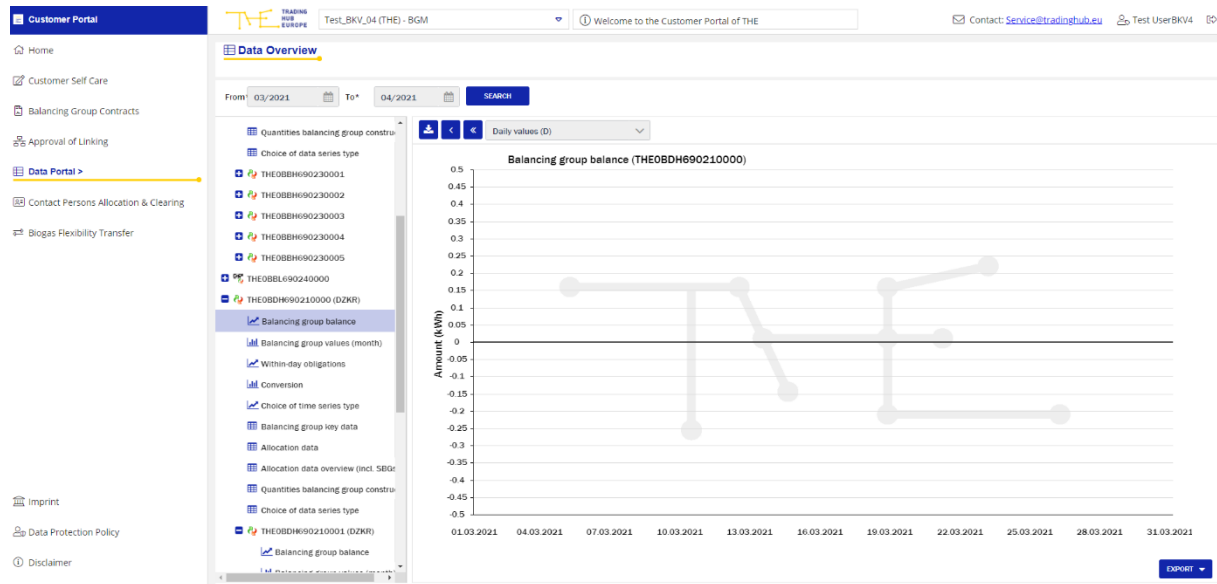

The values are displayed as daily and monthly values and can be exported.

7.4.7 Free data series selection

The functions are the same as in the chart (section 7.1.5)

7.4.8 DZK balancing groups

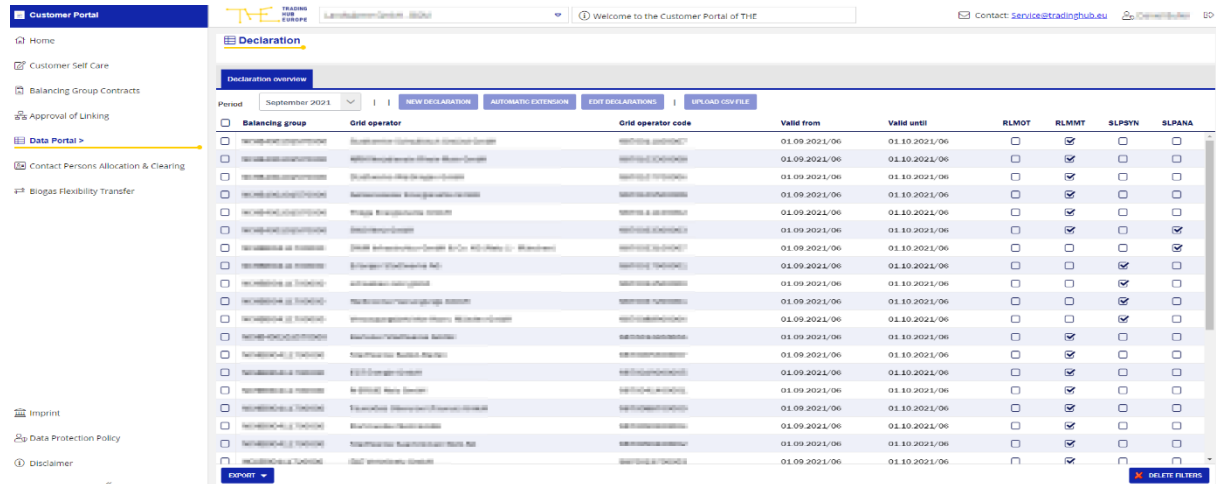

For the DZK balancing groups (which can be recognised by the DZKR or DZKN tag), the key figures for the uninterrupted and interrupted periods are shown.

The key figures for the uninterrupted period are identified by the acronym oNBS (“*ohne*

Nutzungsbeschränkung” = “without usage restriction”) and the key figures during the interruption are identified by the acronym NBS (“*Nutzungsbeschränkung*” = usage restriction).

7.5 Declaration

Balancing group	Grid operator	Grid operator code	Valid from	Valid until	RLMOT	RLMMT	SLPSYN	SLPANA

The declaration overview shows all available declarations for your balancing groups for the selected month. The month for which the most recent declarations are available are always shown first. The view shows the balancing group, the name of the network operator, the market partner code of the network operator (DVGW code), the period of validity of the declaration and the information about which data series type was registered.

By selecting a specific period, you can also view declarations from previous months.

The selected month can be exported in various formats (CSV, EXCEL and PDF).

7.6 Allocation clearing

7.6.1 Overview

Allocation Clearing

Overview Grid operator Clearing

Period July 2021 GET CLEARING-ID

Call	Clearing-ID	Balancing group	Grid operator code	Time series	Valid from	Valid until	Status	User
31.08.2021 10:33:51	000000025	THE0BFL990080000	987	ENTRYSO	01.07.2021/06	01.08.2021/06	Available	testuserbkw4

Page 1 of 1 EXPORT DELETE FILTERS

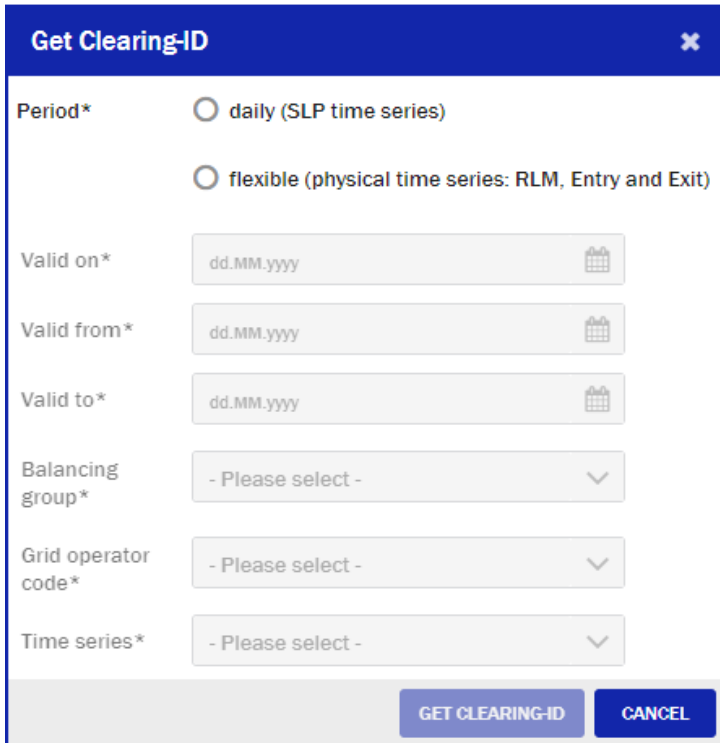

The allocation clearing offers the possibility to correct allocations together with the network operators within the clearing period.

In the "Overview" area you can request a new clearing number and also view clearing applications for the current clearing period that are already being processed. You can view the following information:

- Request (time the clearing number was requested in the Portal)
- Clearing number
- Balancing group for which the clearing number was requested
- Network (the DVGW number of the network operator concerned)
- Data series for which the clearing number was requested
- "Valid from" date
- "Valid until" date
- Status (processing status of your clearing number -> green: clearing number is open; yellow: clearing number has been successfully processed or is no longer valid)

- User (login name of user who requested the clearing number)

You can click on "Get clearing ID" to generate a new clearing number.

The dialog box titled "Get Clearing-ID" contains the following fields:

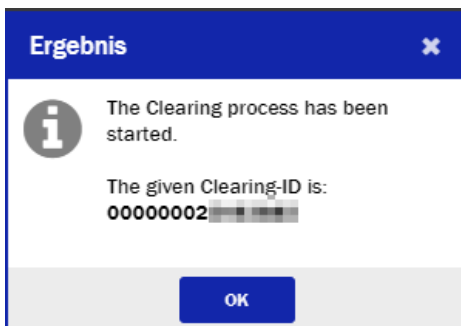

- Period***: Radio buttons for "daily (SLP time series)" and "flexible (physical time series: RLM, Entry and Exit)".
- Valid on***: Date input field (dd.MM.yyyy) with a calendar icon.
- Valid from***: Date input field (dd.MM.yyyy) with a calendar icon.
- Valid to***: Date input field (dd.MM.yyyy) with a calendar icon.
- Balancing group***: Dropdown menu with "- Please select -".
- Grid operator code***: Dropdown menu with "- Please select -".
- Time series***: Dropdown menu with "- Please select -".

At the bottom right, there are two buttons: "GET CLEARING-ID" and "CANCEL".

Important: The following deadlines must be observed. You can only request clearing numbers within these deadlines. Outside these deadlines, no valid time slot will be made available to you.

- SLP: D-1 from 13:00 hrs until M+2M-10WT-1KT
- Physical points: M+15WT until M+2M-10WT-1KT

After you have entered all the data, click on "Get clearing ID" to see your clearing number:

The dialog box titled "Ergebnis" displays the following information:

- An information icon (i) next to the text: "The Clearing process has been started."
- The text: "The given Clearing-ID is:" followed by the ID "00000002" and a masked portion of the ID.

An "OK" button is located at the bottom center.

Please note:

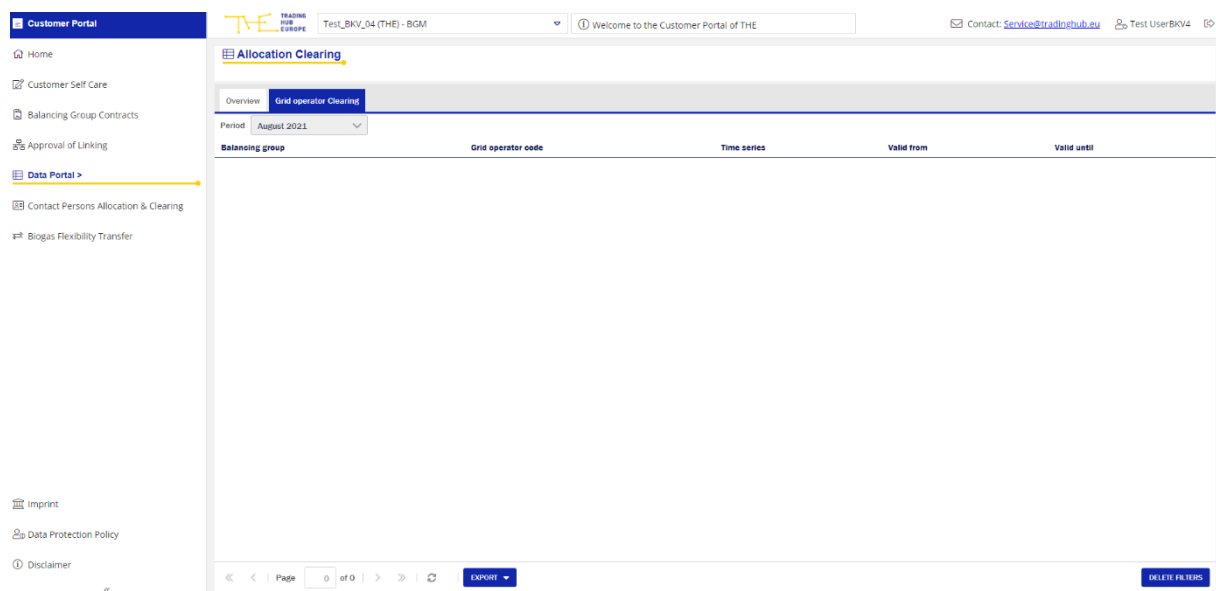

For the SLP data series type, you have to apply for a clearing number for each individual day.

For physical data series types for an entire month, you only need one clearing number, provided that the declaration has been made consistently for the entire month.

Once you have submitted a request a clearing number, the network operator concerned will receive an e-mail listing your balancing group, the network, the data series concerned in the clearing and the validity period.

Important: The clearing number is not emailed to the network operator! It has to be submitted to the network operator by the balancing group manager.

7.6.2 Network operator clearing

Network operator (NO) clearing can be carried out only by the NO (no clearing number of BGM required) and serves exclusively to correct the RLM quantity revalued with the billing CV. The balancing CV is not corrected.

In the "Grid operator clearing" area, you can view information on the NO clearing applications submitted by the network operators for your balancing groups for the current clearing period.

The following information is shown here:

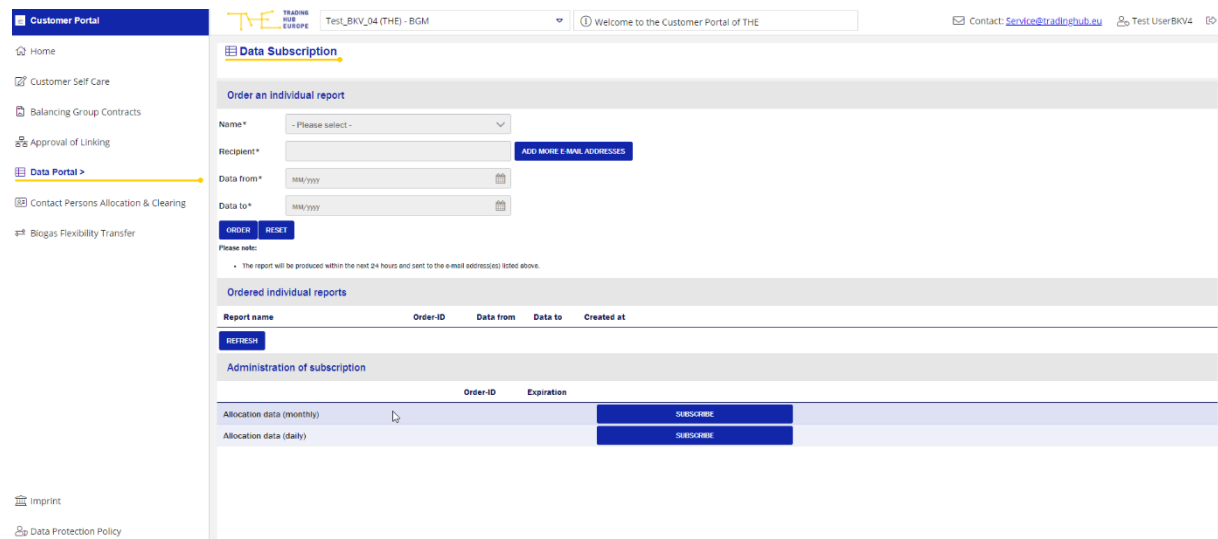

- Balancing group for which the clearing number was requested
- Network (the DVGW number of the network operator concerned)
- Data series for which the clearing number was requested

- "Valid from" date
- "Valid until" date

You will also receive this information by e-mail. The recipient is the "EDM contact person" stored in the Customer Portal.

Important: The NO clearing number is not displayed in the Portal and is not made available by e-mail! The network operator can perform the clearing process without the BGM's consent. This overview is provided to the BGM for information purposes only.

7.7 Data requests

The screenshot displays the 'Data Subscription' interface in the Customer Portal. It includes a navigation menu on the left, a header with the user's name and contact information, and a main content area. The 'Order an individual report' section contains a form with the following fields: Name (dropdown), Recipient (text input with an 'ADD MORE E-MAIL ADDRESSES' button), Data from (calendar icon), and Data to (calendar icon). Below the form are 'ORDER' and 'RESET' buttons. A 'Please note' section states: 'The report will be produced within the next 24 hours and sent to the e-mail address(es) listed above.' The 'Ordered individual reports' section features a table with columns: Report name, Order-ID, Data from, Data to, and Created at. The 'Administration of subscription' section contains a table with columns: Order-ID and Expiration. Two rows are visible: 'Allocation data (monthly)' and 'Allocation data (daily)', each with a 'SUBSCRIBE' button.

In the "Data Subscription" section, you can make an individual request for historical data.

The following individual requests can be made:

- Allocation evaluation (individual request)
- HL-LH conversion quantities

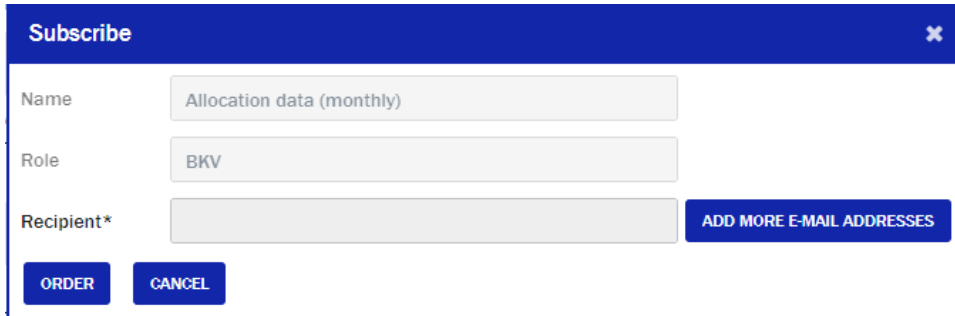

In addition, you can select subscriptions for data provided on a monthly (dispatch after completion of the delivery month) and/or daily basis.

Under a daily subscription, only the most recent data for checking the daily allocations is made available.

To request data as part of an individual request, you need to enter one or more recipient addresses and then specify the desired period in the "MM/YYYY" format. After you have clicked on "Order", the individual order will appear in the "ordered individual reports" list. The order will be processed within the next 24 hours and will generate a separate e-mail

for each month ordered. If you have access to the data of several companies, you will receive a separate file for each company.

The subscription function, on the other hand, is an automated process. When you click on "Subscribe" you will see the following window:

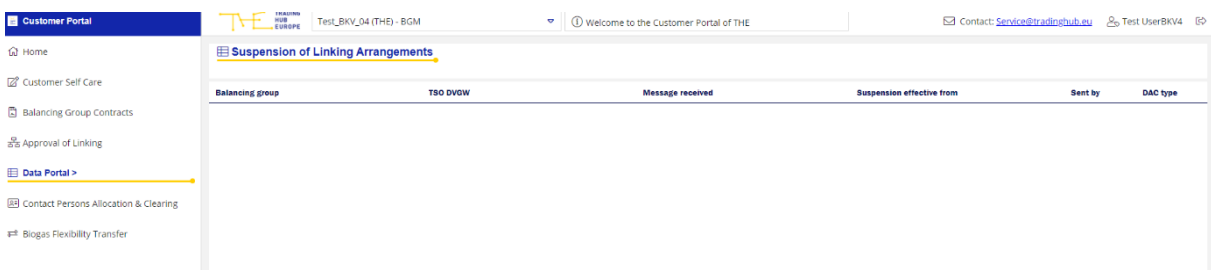

This is where the recipient (or recipients) must be entered. The process then has to be confirmed by clicking "Order", which takes you back to the overview.

The subscription expires automatically after one year, but can be extended by another year by clicking "Extend". The maximum duration of a subscription is 24 months. After this period has expired, the subscription must re-entered. The subscription can be terminated at any time by clicking "Unsubscribe".

Administration of subscription					
	Order-ID	Expiration			
Allocation data (monthly)	258	10/01/2021	UNSUBSCRIBE	EXTEND	EDIT
Allocation data (daily)			SUBSCRIBE		

7.8 Restriction of use

Balancing group	TSO DVGW	Message received	Suspension effective from	Sent by	DAC type

This is where restrictions of use for DZK balancing groups can be viewed. The system will display the balancing group, the DVGW code of the gas TSO that issued the restriction, the time of the notification, the start of the interruption, the login of the user who created the interruption and the DZK type.

In addition to what is displayed in the Portal, the BGM will also receive the information about the granted usage restriction by e-mail to the recipient retained in the master data.

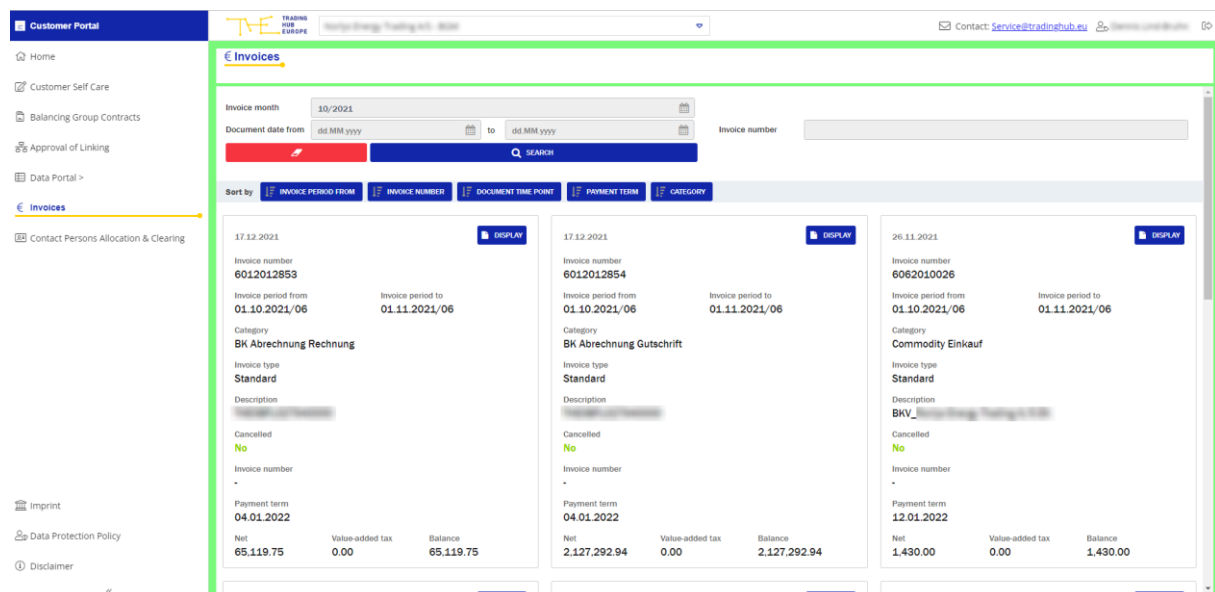

The information that an interruption has been granted is sent both to the BGM of the BG concerned and to the higher-level BGM (if the BG has been assigned to another "foreign" BG).

8 Invoices

Every user with access to the data portal has access to the menu "Invoices". Here you can view and download the invoices sent by THE. In addition, older invoices are also

available. To download the invoice, please press the button  and then download the file.

- Balancing group invoices/credit note
- Monthly biogas invoices
- Final biogas invoices
- VTP invoices
- External system balancing invoices (e.g. LTO, STB, SCB, FLEX)

The screenshot displays the 'Invoices' section of the Customer Portal. It features a search bar with filters for 'Invoice month' (set to 10/2021), 'Document date from' (dd.MM.yyyy), and 'Invoice number'. Below the search bar, there are three columns of invoice details, each with a 'DISPLAY' button. The first invoice is dated 17.12.2021 with number 6012012853. The second is dated 17.12.2021 with number 6012012854. The third is dated 26.11.2021 with number 6062010026. Each invoice card shows the invoice period, category, type, description, cancellation status, and a summary table with Net, Value-added tax, and Balance.

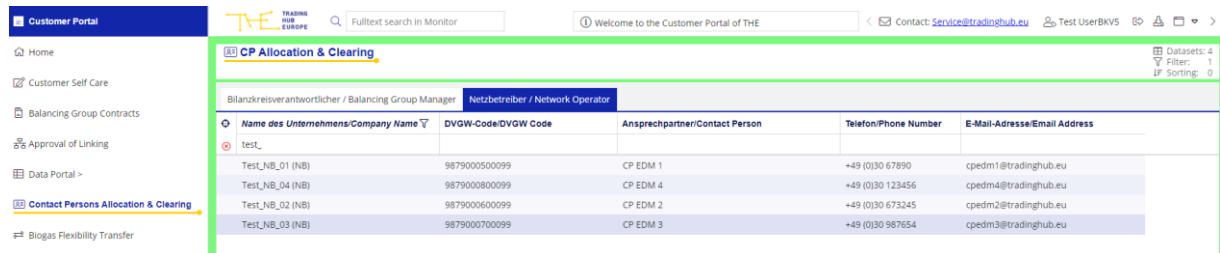

Invoice number	Invoice period from	Invoice period to	Category	Invoice type	Net	Value-added tax	Balance
6012012853	01.10.2021/06	01.11.2021/06	BK Abrechnung Rechnung	Standard	65.119.75	0.00	65.119.75
6012012854	01.10.2021/06	01.11.2021/06	BK Abrechnung Gutschrift	Standard	2.127.292.94	0.00	2.127.292.94
6062010026	01.10.2021/06	01.11.2021/06	Commodity Einkauf	Standard	1.430.00	0.00	1.430.00

The available invoices can be searched by invoice month, document date or invoice number. The search fields can be cleared again by clicking on the eraser.

In addition, the invoices can be sorted by invoice period, invoice number, document time point, payment term and category.

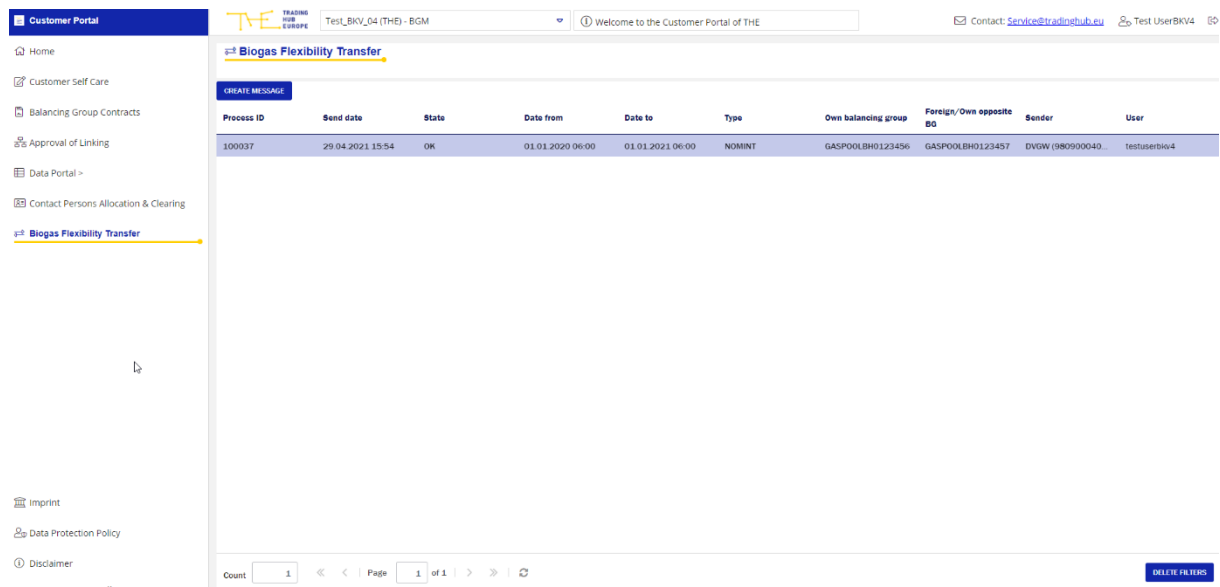

9 Contact person for allocation & clearing

The menu item "Contact person for allocation & clearing" is available to every user, regardless of the authorisations. Here, the contact persons for the allocation & clearing processes of Balancing Group Managers and Network Operators can be viewed. The list can be searched via the search bar. You can also click on the column header to sort a desired column in ascending or descending order.

Name des Unternehmens/Company Name	DVGW-Code/DVGW Code	Ansprechpartner/Contact Person	Telefon/Phone Number	E-Mail-Adresse/Email Address

10 Biogas flexibility swap

Process ID	Send date	State	Date from	Date to	Type	Own balancing group	Foreign/Own opposite BG	Sender	User
100037	29.04.2021.15:54	OK	01.01.2020 06:00	01.01.2021 06:00	NOMINT	GASPOOLBH0123456	GASPOOLBH0123457	DVGW (980900040)	testuserbio4

If you have biogas balancing groups and have been authorised to swap biogas flexibilities in the Portal, you can check the flexibility transfer process here. To do so, click on "Create message" to open the relevant window. Please enter the current balancing period of your balancing group, the balancing group number of your own balancing group (must be a master balancing group), the role of the balancing group manager (i.e. delivering or receiving BG), the balancing group manager to which the quantities are to be transferred or from which quantities are to be received (the role is assigned automatically) and the quantity to be swapped. By clicking on "Create message" you can create a NOMINT message. For the swap to be successful, an identical message from the counterpart must be received. Only then will the transfer be executed.

As soon as the matching has been completed, you can view the swap in the Data Overview – Flexibility Account chart.
